OF THE
STATE OF OREGON**

In the Matter of the Petition by Powder)
 Valley Water Control District to Map) FINAL ORDER APPROVING AN
 District Water Rights Pursuant to ORS) ORS 541.329 PETITION
 541.329, Baker and Union Counties,)
 Oregon)

Authority

ORS 541.329 establishes the process in which a district may petition the Water Resources Commission for approval and acceptance of a district map identifying the location and use of the water rights within the district.

Findings of Fact

1. Pursuant to ORS 541.329,

POWDER VALLEY WATER CONTROL DISTRICT
 P.O. BOX 189
 NORTH POWDER, OR, 97867,

submitted a petition requesting approval and acceptance of district maps showing the location and use of water rights within Powder Valley Water Control District. The petition was submitted to the Oregon Water Resources Commission on June 15, 1993, and included the required fees.

2. Powder Valley Water Control District (PVWCD) petitioned all or a portion of the following water rights of record authorizing irrigation of 18,989.90 acres, supplemental irrigation of 4,897.20 acres and storage of 1,000.00 acre-feet of water:

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675 you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

3. The petitioned water rights of record authorize the use of water from the following sources:

WATER SOURCES	
Anthony Creek, tributary of North Powder River	Shaw Brandt Reservoir, tributary of Dry Creek (a.k.a. Peach Creek)
Big Muddy Creek, tributary of Muddy Creek	Springs in the SW ¼ NW¼, Section 18, Township 6 South, Range 39 East, W. M.
Crooked Slough, tributary of Little Creek	Summit Lake Reservoir, tributary of North Powder River
Dry Creek (a.k.a. Peach Creek), tributary of Clover Creek	Sump Well, tributary of Warm Springs Creek (a.k.a. Hot Creek)
Gussie Creek, tributary of Clover Creek	Two Unnamed Streams, tributary of Muddy Creek
Kilmerque Creek, tributary of Rock Creek	Unnamed Stream
Little Creek, tributary of Wolf Creek	Unnamed Streams, tributaries of Dry Creek (a.k.a. Peach Creek)

4. A summary of the rights modified by the petition is displayed in Table 1.
5. The location of the water rights modified by the petition is listed in Table 2.
6. The location and use of the petitioned water rights are described in Table 3.
7. The district map, labeled Umpleby and Fuchs, identifies the petitioned location and use for 34.0 acres of 1879 priority water right under Certificate 4171. Transfer Application T-7503 affected the rights described by Certificate 4171, and yielded Water Right Certificate 86879 that subsequently described the 34.0 acres of 1879 priority water right. Certificate 86879 is the right petitioned, not Certificate 4171, and the map location labeled as "4171" should be read as describing the petitioned location and use of Certificate 86879.
8. The location and use of the water rights not modified by the petition are described in Table 4. The Department shall issue water right certificates describing the remainder of the water rights not modified by the petition.

9. Water rights not modified by the petition may conflict with petitioned rights. This means that multiple irrigation (both irrigation and supplemental irrigation) rights, termed layered rights, may be located on the same land parcel. Layered irrigation water rights are not cumulative. Such layered water right conflicts shall be resolved by the landowner or district at the time of any subsequent water right transfer. These conflicts may be resolved by the landowner or district canceling all or a portion of a water right. Similarly, where multiple irrigation rights exist, the landowner or district may resolve the conflict by diminishing all or a portion of a water right from irrigation to supplemental irrigation. Alternatively, in processing a transfer application where multiple, layered irrigation rights exist for the same land parcel, the Department shall designate the right with the oldest priority date as the primary irrigation right and diminish all other rights to supplemental irrigation unless the applicant specifies otherwise.
10. Table 5 describes the location and use of the water rights petitioned to be canceled.
11. The points of diversion for the petitioned water rights are listed in Table 6.
12. The Department has reviewed the petition and maps submitted by the District. Staff's report on its findings is on file at the Department. Based upon its review and report, the Department finds:
 - a. PVWCD is a "district" as defined in ORS 541.325(1)
 - b. PVWCD has met the notice requirements of ORS 541.325(4)
 - c. PVWCD filed its petition and maps in a timely manner.
 - d. PVWCD paid the fees required under ORS 536.050(1)(m)
 - e. PVWCD certified that the notice requirements of ORS 541.325(4) were met.
 - f. The acreage petitioned is within the limits of the eligible water rights and the limits set forth in ORS 541.331(4).
 - g. The petition does not expand the total rights of record of the district.
 - h. The proposed changes result in no injury to existing water rights.
 - i. The content and quality of PVWCD's petition and maps meet the requirements of ORS 541.331(4).

Conclusions of Law

The petition and maps submitted by Powder Valley Water Control District comply with the requirements of ORS 541.325 to ORS 541.333.

Now, therefore, it is ORDERED:

1. The Department approves Powder Valley Water Control District's petition and maps of water rights.
2. The Department shall issue new confirming water right certificates conforming to the approved petition for:
 - irrigation of 11,155.45 acres;
 - supplemental irrigation of 3,143.20 acres; and
 - storage of 160.30 acre-feet.
3. The Department shall issue new remaining right certificates to describe that portion of those rights not petitioned or canceled (unmodified by the petition) for:
 - irrigation of 6,594.85 acres; and

- supplemental irrigation of 968.60 acres.

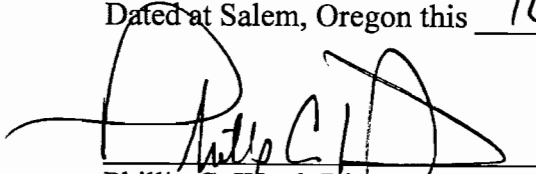

4. The new certificates shall retain the appropriate conditions and limitations upon the rights, seasons of use, priority dates, and rate and duty limitations. The following reference table identifies the new certificates resulting from approval of the petition:
