Order Approving Water Management and Conservation Plan, Permit #13316

Dear Barbara:

The City of Sisters' updated Water Management and Conservation Plan was published in the Water Resources Department's public notice. One comment was received and is attached for your review. Based on comments received and our Department's review, I am pleased to inform you that your updated Water Management and Conservation Plan has been approved.

Approval of this plan satisfies two requirements. First, it satisfies the condition of water right permit number G-13316, held by PMR Development for the Pine Meadows Ranch Inc. Because the City of Sisters annexed the new Pine Meadows Village development, PMR Development was required to update the City of Sisters' plan. Second, the original plan approval also required an updated plan when any large development occurred that would substantially alter the water supply/ demand outlook for the community.

An update plan will be required in ten years, or on July 13, 2009. You may also choose to update the plan during your next periodic review. In the meantime, efforts to reduce peak summer usage is encouraged. We sincerely appreciate your efforts in completing the plan update and promoting conservation in the City of Sisters. If you have any questions or comments, please contact Lara Burgel of our staff at (503) 378-8455, extension 301.

Sincerely,

Richard D. Bailey
Administrator, Resource Management Division
