

3. Notice of the application for groundwater registration modification was published on May 12, 2020, pursuant to OAR 690-382-0600. No comments were filed in response to the notice.
4. On October 1, 2021, the Department mailed a copy of the draft Preliminary Determination proposing to deny Transfer Application T-13418 to the applicant. The Department determined the proposed point of appropriation (POA) identified as South Well, would likely cause an overall increase in interference with the Santiam River. The draft Preliminary Determination cover letter set forth a deadline of November 1, 2021, for the applicant to respond.
5. On October 12, 2021, the applicant contacted the Department. They inquired whether the use could be reduced from the South Well under the applicable groundwater registration, to keep the impact to the Santiam River at its current authorized degree or less. The Department determined the impact to the river could be modeled, to determine what rate would not exceed that impact with the proposed APOA. The applicant intends to convert the acreage to drip irrigation, indicating that they intend to pump less.
6. On August 16, 2022, the Department completed the modeling to determine what pumping rate for the South Well would likely cause similar or lesser depletions of the Santiam River. The Department determined that restricting pumping of the South Well (MARI 65694) to a maximum rate of not to exceed 0.2593 cubic foot per second (116.4 gallons per minute) under T-13418, will likely prevent a substantial increase in depletions of the Santiam River.
7. On August 18, 2022, the applicant responded that the reduced rate for the South Well is acceptable and asked the Department to proceed.
8. On October 20, 2022, the Department mailed a copy of the revised draft Preliminary Determination proposing to approve Groundwater Registration Modification Application T-13418 to the applicant. The revised draft Preliminary Determination cover letter set forth a deadline of November 21, 2022, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
9. On February 10, 2023, the Department issued a Preliminary Determination proposing to approve Groundwater Registration Modification T-13418 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the groundwater registration modification application was published on the Department's weekly notice on February 14, 2023, and in the Scio Tribune newspaper on February 16 and 23, 2023 pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notices.
10. On February 14, 2023, the applicant's agent informed the Department that the Applicant has changed addresses.

11. The portion of the groundwater registration to be modified is as follows:

**Registration:** Application GR-1219 (Certificate of Registration GR-1179), in the name of WALTER GLASGOW (*assigned to* FULL HARVEST AGRICULTURAL HOLDCO II, LLC)

**Use:** IRRIGATION of 8.0 ACRES

**Tentative**

**Priority Date:** JUNE 1945

**Quantity:** 133.3 GALLONS PER MINUTE

**Source:** PUMP WELL NO. 2

**Original Point of Appropriation:**

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
10 S	3 W	WM	13	NW SW	PUMP WELL NO. 2 - 3400 FEET SOUTH AND 900 FEET EAST FROM THE NW CORNER OF SECTION 13

**Original Place of Use:**

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
10 S	3 W	WM	13	NW SW	8.0

12. Groundwater Registration Modification Application T-13418 proposes to modify the location of the original point of appropriation from the original well to:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances	Approximate distance from original point of appropriation in miles (mi.)
10 S	3 W	WM	13	NW SW	NORTH WELL - 1380 FEET NORTH AND 730 FEET EAST FROM THE SW CORNER OF SECTION 13	0.1 mi.
10 S	3 W	WM	24	NW NW	SOUTH WELL - 300 FEET SOUTH AND 670 FEET EAST FROM THE NW CORNER OF SECTION 24	0.4 mi.

**Review Criteria for Groundwater Registration Modification Applications [OAR 690-382-0700(2)]**

13. The proposed modification would not result in enlargement of the groundwater registration.
14. The proposed modification would not result in a state Scenic Waterway not receiving previously available water during periods in which streamflows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.
15. The proposed modification, as conditioned, would not result in injury to other water rights.

**Conclusions of Law**

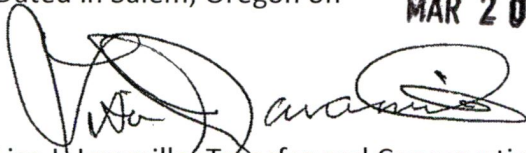

The modification in point of appropriation proposed in Groundwater Registration Modification T-13418 is consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000.

**Now, therefore, it is ORDERED:**

1. The modification to Registration Application GR-1219 (Certificate of Registration GR-1179) proposed in Groundwater Registration Modification Application T-13418 is recognized. Recognition of the modification shall not be construed as a final determination of the right to appropriate groundwater under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-1219 (Certificate of Registration GR-1179) and any related decree.
3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
4. Water shall no longer be appropriated from the original point of appropriation for the 8.0 acres described in Finding of Fact 9, as part of this groundwater certificate of registration.
5. The quantity of water diverted at the new point of appropriation (North Well), shall not exceed the quantity of water lawfully available at the original point of appropriation (Pump Well No. 2).
6. The quantity of water diverted at the new point of appropriation (South Well) is authorized a maximum rate of not to exceed 116.4 gallons per minute (0.2593 cubic foot per second).

Dated in Salem, Oregon on

**MAR 20 2023**

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for  
DOUGLAS E. WOODCOCK, ACTING DIRECTOR  
Oregon Water Resources Department
