37 S	4 E	WM	4	SE SE	4000 FEET SOUTH & 600 FEET EAST FROM NE CORNER, SECTION 4

Authorized Place of Use: Same as for Certificate80570.

- The lease application includes the information required under OAR 690-077-0077(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(6). No other comments were received.

4. The applicant modified the application so that the Bureau of Reclamation is not a co-lessor on this lease.
5. The instream use is clarified from the lease application to prevent injury and enlargement and is as follows:

Instream Reach: At the Jackson Street Creek Gage (BJBO) on Bear Creek.

Certificate	Priority Date	Primary Instream Rate (cfs)	Supplemental Instream Rate (cfs)	Period Protected Instream
80570	July 23, 1909	0.11		June 20 through October 31
80578	March 1, 1915		0.11	June 20 through October 31
80572	March 31, 1910		0.11	June 20 through October 31

6. Other conditions to prevent injury and enlargement are:
 - A. MID shall divert water at the PODs described in Finding of Fact #2. Water shall be diverted and transported to Bear Creek in the Joint System Canal and the East Main Canal and then released from the canal through the control structure used to deliver water into Bear Creek for District patrons diverting from Bear Creek.
 - B. MID shall maintain a minimum flow through the control structure used to deliver water into Bear Creek by keeping the bottom of the diversion board open, notching the diversion board or other method of passing water that is acceptable to the watermaster, thereby allowing the leased water to return to Bear Creek at a constant rate.
 - C. MID shall report to the District 13 Watermaster's office the amount of water being delivered to the Bear Creek users. This quantity of water shall be additive to the amount of water being leased instream. After the initial report, subsequent reports need to be made to the Watermaster's office within one day of when delivery changes are made.
 - D. The portion of water protected instream under this lease shall be based at the same percentage of diversion and delivery rate that MID is diverting to rights of the same priority within the district. When MID is diverting water on a percentage basis, MID shall report to the District 13 Watermaster's office the percentage diverted under the July 23, 1909, March 31, 1910, and March 1, 1915 priority dates. This information only needs to be reported to the Watermaster's office once MID is diverting water on a percentage basis (less than the 1/100th cfs/acre). Subsequent reports need to be made to the Watermaster's office within one day of when changes are made to the percentage of water being diverted. Once MID begins diverting water on a percentage basis, the amount water leased instream shall be adjusted by that same percentage. In the event that MID stops delivery irrigation water prior to October 31, the watermaster shall be notified and the delivery for instream use shall also stop.
7. Certificate 80578 and 80572 are supplemental to Certificate 80570. The portion of Certificates 80578 and 80572 being leased instream shall only be protected instream if the full rate and duty under Certificate 80570 is not available during the period for which water is being leased instream.
8. Based upon review of the application, comments received, information provided by the Department's Watermaster, and other available information, the Department finds that the

lease will not result in injury or enlargement. This finding is made through an abbreviated review recognizing that the lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.

9. If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077-0070 or OAR 690-077-0075 a new injury review shall be required. Transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of future leases or transfers.

10. The lease will terminate on October 31, 2006.

CONCLUSIONS OF LAW

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease agreement conforms to the applicable provisions of OAR 690-077-0015.

ORDER

Therefore, it is ORDERED:

1. That the Short-Term Lease as described herein is APPROVED.
2. The former place of use shall no longer receive water as part of these rights during the term of the lease.

Dated at Salem, Oregon this 6th day of September 2006.

Phillip C. Ward, Director
