19. The Department has determined that the proposed additional points of appropriation Ditchen Wells #1 and #2 are all within the same subareas (D and H) of the Stage Gulch Critical Ground Water Area and will all develop the same source of water as the authorized existing wells.
20. Pursuant to OAR 690-385-3110, water use under existing water rights or water use permits existing on either the authorized or the proposed place of use will remain unexercised and will not be transferred during the course of the 2013 irrigation season.
21. The district temporary transfer application satisfies the criteria of OAR 690-385-3000, contains the information required under OAR 690-385-3200, and includes a map meeting the requirements of OAR 690-385-3300.
22. The water rights are subject to transfer as defined in OAR 690-385-0100(17).
23. The proposed changes in place of use would not result in enlargement of the rights.
24. The proposed changes would not result in injury to other water rights.

Conclusions of Law

The temporary changes in place of use and additional points of appropriation as proposed in Transfer Application T-11571 satisfy the requirements of ORS 540.574(3) and 540.570.

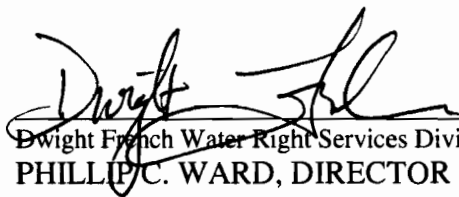

Now, therefore, it is ORDERED:

1. The temporary changes proposed in Transfer Application T-11571 are approved.
2. The former places of use **shall not** be irrigated as part of these water rights during the 2013 irrigation season.
3. The use shall revert to the authorized places of use at the end of the 2013 irrigation season. The authorization to use the additional points of appropriation shall be terminated concurrently.
4. The right to the use of the water at the temporary place of use authorized by this transfer shall be in accordance with the conditions and limitations contained in Certificates 85124,

74896 (as modified by Transfer Application T-6787), 74762, 80850, 87111, 87666, 87667, 87042 and water use Permit S-54773 and any related decree.

5. The water rights appurtenant to the new proposed place of use, in conjunction with all other water rights or water use permits secured under any other right existing for the same lands shall be limited to 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.
6. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.
7. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
8. The use of water on the lands from which the water right is transferred and at the new temporary place of use during the same irrigation season or calendar year is prohibited and may subject the district and landowner to civil penalties.
9. The water user shall maintain and operate the existing measurement devices and shall make such improvements as may be required by the Department.
10. The use of water under this temporary transfer may be conditioned or revoked at any time to the extent necessary to avoid injury if the Department finds the transfer causes injury to any existing water right.
11. A subsequent application for permanent transfer of Certificates 85124, 74896 (as modified by Transfer Application T-6787), 74762, 80850, 87111, 87666, 87667, 87042 and water use Permit S-54773 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Divisions 380 and 385. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
12. Additional measurement and reporting conditions, including, but not limited to, additional measuring sites, general water use information, and the place and nature of water use may be required at the discretion of the Department.
13. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
14. The use of the remaining water rights described by Certificates 85124, 74896 (as modified by Transfer Application T-6787), 74762, 80850, 87111, 87666, 87667, 87042 and water use Permit S-54773 shall continue to be in accordance with the terms and conditions of Certificates 85124, 74896 (as modified by Transfer Application T-6787), 74762, 80850, 87111, 87666, 87667, 87042 and water use Permit S-54773.
