The amount of water used for irrigation, together with the amount secured under any other right existing on the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

The authorized place of use is as follows:

SECTION 11		
TOWNSHIP 15 SOUTH, RANGE 14 EAST, W.M.		

The use of water allowed herein may be made only at time when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include air lines and pressure gauges or access ports for measuring line adequate to determine water level elevation in the wells at all times.

The user shall maintain weirs, meters or other suitable devices, and shall keep a complete record of the amount of ground water withdrawn.

This use may be regulated if analysis of data available discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of this right or as those quantities may be reduced.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

The applicant proposes to change the point of appropriation to:

SW¼ SE¼, SECTION 11, T 15 S, R 14 E, W.M.; 1179 FEET NORTH AND 1505 FEET WEST FROM THE SE CORNER, SECTION 11.

THIS CHANGE TO AN EXISTING WATER RIGHT MAY BE MADE PROVIDED THE FOLLOWING CONDITIONS ARE MET BY THE WATER USER:

1. The proposed change shall be completed on or before October 1, 2004.
2. The quantity of water diverted at the new point of appropriation (well), together with the quantity diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available from the original points of appropriation.
3. **Prior** to appropriating water from the new point of appropriation, the water user **shall** install an in-line flow meter or other suitable device for measuring and recording the quantity of water used. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

4. Water shall be acquired from the same aquifer as the original point of appropriation.

Certificate 76525 is canceled. A new certificate will be issued to confirm that portion of the right NOT involved in this transfer. When satisfactory proof of the completed change is received, a new certificate confirming this water right will be issued.

Director, affixed OCT 11 2002.
