The applicant proposes to change the use of a water right perfected under Permit G-9976 to QUASI-MUNICIPAL USE.

Satisfactory proof for the completion of Permit G-9320 is confirmed as described above.

THIS CHANGE TO AN EXISTING WATER RIGHT MAY BE MADE PROVIDED THE FOLLOWING CONDITIONS ARE MET BY THE WATER USER:

1. The proposed changes shall be completed on or before October 1, 1999.
2. The quantity of water diverted at the new points of appropriation (wells), together with the quantity diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available from the original points of appropriation.
3. When required by the Department the water user shall install in-line flow meter(s) or other suitable device(s) for measuring and recording the quantity of water used. The type and plans of the measuring device(s) must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
4. If substantial or undue interference with an existing well used under an existing right, including existing exempt uses, occurs, and such interference can be shown to the satisfaction of the Department to result from the change in the way the water rights are exercised as authorized herein, the use of water from the wells authorized by this transfer causing the interference shall be regulated to mitigate the interference.
5. Water shall be acquired from the same aquifer as the original points of appropriation.

Certificates 65352, 65353, 63686 are cancelled. When satisfactory proof of the completed change is received, new certificates confirming these water rights will be issued.

affixed NOV. 04 1997.
