Transfer Review Criteria (OAR 690-380-4010)

9. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
10. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-13632.
11. The proposed point of appropriation, as conditioned, shall be restricted to the same aquifer.
12. The proposed change would not result in enlargement of the rights.
13. The proposed change, as conditioned, would not result in injury to other water rights.
14. All other application requirements are met.

Conclusions of Law

The change in point of appropriation and additional point of appropriation proposed in Transfer Application T-13632 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in point of appropriation and additional point of appropriation proposed in Transfer Application T-13632 are approved.

3. Water right Certificates 86211 and 86212 are cancelled. A new certificate will be issued describing that portion of Certificate 86212 not affected by this transfer.
4. Under Certificate 86211, the quantity of water diverted at the new point of appropriation (Well 2), shall not exceed the quantity of water lawfully available at the original point of appropriation (Rew Well #1).
5. Under Certificate 86212, the quantity of water diverted at the new additional point of appropriation (Well 2), together with that diverted at the original point of appropriation (Rew Well), shall not exceed the quantity of water lawfully available at the original point of appropriation (Rew Well).

6. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).

 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
7. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
