

**BEFORE THE WATER RESOURCES DEPARTMENT  
OF THE  
STATE OF OREGON**

In the Matter of Allocation of Conserved ) FINAL ORDER OF APPROVAL OF  
Water Application CW-137, ) ALLOCATION OF CONSERVED WATER  
Deschutes and Jefferson Counties ) CW-137

**Applicant**

Three Sisters Irrigation District  
PO Box 2230  
Sisters, OR 97759  
[office@tsidweb.org](mailto:office@tsidweb.org)

**Agent**

Deschutes River Conservancy  
700 NW Hill Street, Suite 1  
Bend, OR 97703  
[gen@deschutesriver.org](mailto:gen@deschutesriver.org)

**Applicable Law**

Any person or group of persons holding a water use subject to transfer as defined in ORS 540.505 may submit an application for an Allocation of Conserved Water to the Water Resources Commission for a conservation project that has not yet been implemented or was implemented within five years prior to the submission of the application. ORS 537.465. Under the Allocation of Conserved Water Program, a portion of the water proposed to be conserved by an applicant may be used on additional lands, put to a different use, or be leased or sold to another user. OAR 690-018-0010. A portion of the water conserved is allocated to the state to be converted to an instream water right or to revert to the public for appropriation by other water users. ORS 537.470(3).

An application for an allocation of conserved water shall include: (a) A description of the measure as implemented and the date on which the measure was implemented; (b) A description of the diversion facilities before the conservation measure was implemented and the amount of water that was diverted at the facilities before the conservation measure was implemented; (c) The amount of water needed to supply existing rights after implementation of the conservation measure; (d) The amount of water conserved by implementing the conservation measure; (e) The proposed allocation and use of the conserved water if different from the allocation specified in ORS 537.470; (f) The intended use of any water allocated to the applicant and the proposed location of use; (g) The applicant's choice of priority date for the conserved water; (h) Evidence

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

that the measure was implemented within five years prior to the date of filing the application; and (i) Any other information the commission considers necessary to evaluate the application. ORS 537.465.

After determining any quantity of water needed to mitigate the effects on other water rights, 25-percent of the conserved water shall be allocated to the state and 75-percent to the applicant unless the applicant proposes a higher allocation to the state or more than 25-percent of the funds used to finance the conservation measures comes from federal or state sources not subject to repayment. ORS 537.470(3).

If an application for the allocation of conserved water is approved, the Department shall issue orders describing the changes in the original water rights. Once the conservation project is finalized, the Department shall issue new certificates preserving the previously established-priority date of the rights to reflect the unaffected portion of the water rights and new certificates reflecting the changes for the portions of the water rights involved in the conserved water application. ORS 537.470(6).

ORS 537.455 to 537.500 authorize and establish the process by which a water right holder may submit a request for an allocation of conserved water. OAR Chapter 690, Division 18, implements the statutes and provides the Department's procedures and criteria for evaluating allocation of conserved water applications. OAR Chapter 690, Division 077 provides additional criteria for evaluating proposed instream water rights.

### **Findings of Fact**

1. On May 26, 2023, Three Sisters Irrigation District (TSID) filed an allocation of conserved water application under Certificate 95971. The Department assigned the application number CW-137.
2. On July 5, 2005, TSID adopted an Allocation of Conserved Water Policy pursuant to OAR 690-018-0025. On July 6, 2010, September 1, 2015, and again on June 6, 2023, TSID reviewed and renewed the District's Allocation of Conserved Water Policy.
3. The conservation project involves replacing approximately 24,300 feet of open ditch on TSID's Cloverdale Lateral with buried high-density polyethylene (HDPE) pipe. The conversion to an enclosed pipe system is a proven technology for conserving water.

4. Application CW-137 proposes a rate reduction under the 1895 priority date, of approximately 0.33 cubic foot per second (cfs) and proposes to reduce the annual volume by 140.1 acre-feet (AF).

Conserved Water Description						
1985 Priority Date	Certificate		Needed		Conserved Water	
	Rate		Rate		Rate	Duty
Certificate	Maximum CFS	CFS/AC	Maximum CFS	CFS/AC	Maximum CFS	Maximum AF
95971	88.21	0.02	87.88*	0.02	0.33	140.1

Note: All priority dates on the certificate total 118.95 CFS, after CW-137 the total will be 118.62 CFS.

5. The right to be modified by CW-137 is as follows:

**Certificate:** 95971 in the name of THREE SISTERS IRRIGATION DISTRICT (confirmed by SQUAW CREEK [WHYCHUS CREEK] Decree)

**Use:** 5669.21 ACRES FOR IRRIGATION (IR), 46.34 ACRES-EQUIVALENT FOR POND MAINTENANCE (PM), AND LIVESTOCK (LV)

**Priority Date:** 1895

**Rate:** 88.21 CUBIC FEET PER SECOND

**Limit/Duty:** The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-FIFTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated during the irrigation season of each year.

**Source:** WHYCHUS CREEK, tributary of THE DESCHUTES RIVER

**Authorized Point of Diversion:**

<b>TOTAL</b>						<b>46.34</b>	

6. Certificate 95971 and the Squaw Creek Decree do not specify a period of use. However, the Deschutes River Decree specifies an irrigation season of April 1 through October 31. To prevent enlargement of the right, the instream right shall be limited to the irrigation season and such time TSID is diverting water for a beneficial use under Certificate 95971.
7. Water has been used within the five-year period prior to submission of the allocation of conserved water application, and no evidence is available that would demonstrate that the right is subject to forfeiture under ORS 540.610.
8. Diversion structures, canals, and ditches sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of the application.
9. The Applicant requests that the conserved water be allocated as follows:

Certificate- 1895 Priority Date	State's Portion			Applicant's Portion			Conserved Water		
	Percentage	Maximum Rate (CFS)	Max. Duty (Volume) AF	Percentage	Maximum Rate (CFS)	Max. Duty (Volume). AF	Percentage	Maximum Rate (CFS)	Max. Duty (Volume) AF
95971	100%	0.33	140.1	0%	0	0	100%	0.33	140.1

10. The Applicant requests that the priority date for any conserved water be the same as the originating right.
11. The applicant received state and federal funds for 100% of the projected cost of this conservation project. TSID requested 100% of the conserved water be allocated for an instream water right to be held in trust by the Water Resources Department for the people of Oregon.
12. On May 25, 2023, TSID's representative provided notice of the proposed conservation project to the Confederated Tribes of the Warm Springs, Deschutes County Planning Department, Jefferson County Planning Department, and the City of Sisters Planning Department as required by OAR 690-018-0040(22).
13. The Applicant anticipates implementation of the conservation measures to occur on or before November 1, 2023.
14. The Applicant proposes that any instream water right created be for the purposes of conservation; maintenance, and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat, other ecological values, recreation and scenic attraction, and water quality.
15. The Applicant requested the Department protect the new instream water right created from the conserved water under Certificate 95971 from the authorized point of diversion to the mouth of Whychus Creek, then into the Deschutes River to Lake Billy Chinook.
16. The Applicant requested the deadline for submitting the Notice of Completion of November 1, 2023. The Applicant will submit a Request for Finalization of the allocation on or before November 1, 2023.
17. The application meets the requirements of OAR 690-018-0040.
18. The Department has consulted with the Oregon Department of Environmental Quality (ODEQ) to ascertain whether the proposed instream flows are necessary to support instream flow uses. It was determined instream flow requirements exceed natural stream flow, and additional instream flow may improve temperature impairments and water quality for designated beneficial uses: salmonid spawning, rearing, and passage. ODEQ has Whychus Creek identified as water quality limited, 303(d) impaired for temperature within the ODEQ's Water Quality Assessment program. The Department has determined the proposed instream flows are necessary to support instream flow uses. Instream water right certificates 73223 and 73224 exist in the stream reach where the proposed instream water right is to be protected but may not always be met. The public benefit or use for the proposed instream water right is for the same instream flow purposes. The priority date of Certificate 95971 for the portion being conserved is 1895. The priority date of Certificates 73223 and 73224 is October 11, 1990. Replacing a portion of the existing instream water right certificates with an earlier priority date supports the public benefits.

19. Notice of the proposed conservation project was published in the Department’s weekly notice on June 13, 2023, and in the Bend Bulletin newspaper on June 7 and 14, 2023, as required under OAR 690-018-0050(1)(a) and (2). No comments were filed in response to the notices.
20. On August 22, 2023, the Department issued a Preliminary Determination proposing to approve Allocation of Conserved Water application CW-137, and mailed a copy to the Applicant. No protests were filed within 60 days from the date of mailing the Preliminary Determination. OAR 690-018-0050(6).

***Allocation of Conserved Water Review Criteria [OAR 690-018-0050]***

21. The proposed allocation of conserved water will result in a reduced diversion of the use allowed under the existing right pursuant to OAR 690-0018-0050(4)(a). (Finding of Fact #4).
22. On June 6, 2023, the District #11 Watermaster performed a review of the proposed Allocation of Conserved Water Project. The Watermaster determined that the conservation project would not harm other water rights; therefore, no quantity of conserved water is needed to mitigate for harm to other water rights. The Watermaster’s review indicated seepage losses from TSID’s authorized POD located at approximately River Mile (RM) 24.5 to the OWRD gaging station #14076050 at approximately RM 20.7. Enlargement could occur unless the instream water right allows for this seepage loss. The Watermaster’s review also indicated due to the inability to measure the TSID diversion accurately, the new “Whychus Creek below TSID gage” will be used to show the proposed instream water right has been passed. The change in flow from the Whychus Creek near Sisters gage and the Whychus Creek below TSID gage will be used to determine the TSID diversion flow. OAR 690-018-0050(4)(b) and (d).
23. The instream use will be conditioned to allow less water to be protected instream below the point of diversion based upon instream measurements conducted by Department staff or others approved by the Department, which may show lower or higher levels of loss and allow the instream flows to be adjusted accordingly. The instream quantity may not exceed the instream quantity identified at the point of diversion.
24. The conservation project is consistent with the local comprehensive land use plan requirements established in OAR 690-005-0045. OAR 690-018-0050(4)(c). (Finding of Fact #12).
25. Pursuant to OAR 690-018-0050(4)(e), the new reduced rate for the existing uses involved in Allocation of Conserved Water Application CW-137 is as follows:

Priority	Acres or Ac-Eq	Maximum Rate (CFS)
1895	5715.55	87.88

(Finding of Fact #4).

26. Pursuant to OAR 690-018-0050(4)(e), the rate and volume allocated to the State for instream use is as follows:

Priority Date	Maximum Rate (cfs)	Maximum Duty (Volume) (AF)
1895	0.33	140.1

(Finding of Fact #9).

27. As required by OAR 690-018-0050(4)(f), the Department has determined that the instream right created will support public benefits. (Finding of Fact #18).
28. The new instream water right created will be protected in Whychus Creek from the authorized point of diversion as described in Finding of Fact #5, at approximately RM 24.5 to the confluence of Whychus Creek at RM 0, and into the mainstem Deschutes River to Lake Billy Chinook. OAR 690-018-0050(4)(h); OAR 690-077-0015(8).
29. The instream right shall allow the use and protection of flows as follows:

Source: Whychus Creek, a tributary of Deschutes River

From the authorized point of diversion at approximately RM 24.5:

POD	Twp	Rng	Mer	Sec	Q-Q	Measured Distances
1	15 S	10 E	WM	21	SW SW	998 FEET NORTH AND 1211 FET EAST FROM THE SW CORNER OF SECTION 21

Whychus Creek, a tributary of Deschutes River

Priority Date	Period	Location	Rate (cfs)	Volume (AF)
1895	April 1 through October 31	Reach 1: At the authorized POD at approximately RM 24.5 to the mouth of Whychus Creek	0.33	140.1

Deschutes River, tributary to the Columbia River

Priority Date	Period	Location	Rate (cfs)	Volume (AF)
1895	April 1 through October 31	Reach 2: From the confluence of Whychus Creek with the Deschutes River to Lake Billy Chinook at RM 120	0.33	140.1

30. The amount and timing of the proposed instream flows are allowable within the limits and use of the original water right. Within the described instream reach, stream channel losses and gains calculated based on available data and the use of senior appropriators will determine the amount of water to which this right is entitled downstream from the original point of diversion and within the specified stream reach from the point of diversion to the mouth of Whychus Creek and whether the described instream flows below the point of diversion may be adjusted. If adjusted, instream flows from immediately below the point of diversion to the mouth of Whychus Creek and into the Deschutes River to Lake Billy Chinook may not exceed the quantities specified at the point of diversion. OAR 690-077-0015(10).

31. The protection of flows within the proposed reach is appropriate, considering:
  - a. The instream water use begins at the recorded point of diversion;
  - b. The location of confluences with other streams downstream of the point of diversion.
  - c. There are no known areas of natural loss of streamflow to the river bed downstream from the point of diversion; and
  - d. Any return flows resulting from the exercise of the existing water right would re-enter the river downstream of the reach of the instream water right.    OAR 690-077-0015(8).
  
32. The combination of instream rights for the proposed reach on Whychus Creek does not exceed the amount needed to provide increased public benefits, but does exceed the estimated average natural flow or level occurring from the drainage system. The estimated average natural flow may not be exceeded unless criteria for exceeding the estimated average natural flows are met, the Department has determined that the criteria for the exceedance has been met and is better described in the following two paragraphs. OAR 690-077-0015(4) and (11).
  
33. On Whychus Creek, during the period April 1 through September 30, the total quantities of water to be protected instream under the existing and proposed instream rights within a portion of the reach from approximately T15S, R10E, Section 21 (approximately River Mile (RM) 24.5) to the confluence with Indian Ford Creek (just upstream from RM 20) will exceed the quantities identified as necessary for instream use for various fish life stages under Certificate 73224, which was created under ORS 537.341, an application process for state agencies to establish new instream water rights. During the period June 1 through October 31, the total quantities of water to be protected instream under the existing and proposed instream rights within another portion of the reach from T14S, R10E, Section 26 (approximately RM 16) to the mouth of Whychus Creek will exceed the quantities identified as necessary for instream use for various fish life stages under Certificate 73223, which was also created under ORS 537.341. The Oregon Department of Fish and Wildlife has identified that Whychus Creek is a high priority for flow restoration. In addition, the original instream flows established under Certificates 73224 and 73223 were based on flow needs for resident redband trout and did not account for flows necessary to support reintroduction of Mid-Columbia summer steelhead trout and spring Chinook salmon.
  
34. The Department has identified that the quantities protected instream may be additive to other existing instream water rights established within the same reach under ORS 537.341, 537.346, 537.348 or 537.470 during the period of April 1 through September 30 for the portion of the reach extending from approximately T15S, R10E, Section 21 (approximately RM 24.5) to the confluence with Indian Ford Creek (just upstream from RM 20)] and during the period June 30 through October 30 for the portion of the reach extending from T14S, R10E, Section 26 (approximately RM 16) to the mouth of Whychus Creek. In other portions of the identified reach, the quantities protected instream may be additive to other existing water rights established under ORS 537.348 and 537.470 and may replace a portion of existing water rights established under ORS 537.341 or 537.346 with an earlier priority date,

unless otherwise specified in an order approving a new instream water right under these statutes.

35. The deadline for submitting a Notice of Completion is November 1, 2023. The deadline for submitting a Request for Finalization is November 1, 2023. (Finding of Fact #16). OAR 690-018-0050(4)(i).
36. Except as conditioned in Finding of Fact No's 6, 22, and 23, no other conditions or limitations are needed to prevent or mitigate for harm to existing water rights. (Finding of Fact #22). OAR 690-018-0050(4)(j).

**Conclusions of Law**

The project described in Allocation of Conserved Water Application CW-137, is consistent with the criteria in ORS 537.455 to 537.500, and OAR Chapter 690, Divisions 018 and 077.

**Now, therefore, it is ordered:**

1. The proposed change will result in a reduced diversion for the uses allowed with an 1895 priority date under the original water right. Findings of Fact #4 and #21.
2. The proposed allocation of conserved water, as conditioned, will not harm existing water rights. Finding of Fact #22 and #36.
3. The application is consistent with the requirements established in OAR 690-005-0045. Finding of Fact #12 and #24.
4. The changes proposed in CW-137 are approved.
5. The quantities of water conserved and allocated are as follows:

Certificate with an 1895 Priority Date	State's Portion			Applicant's Portion			Conserved Water		
	Percentage	Maximum Rate (CFS)	Max. Duty (Volume) AF	Percentage	Maximum Rate (CFS)	Max. Duty (Volume) AF	Percentage	Maximum Rate (CFS)	Max. Duty (Volume) AF
95971	100%	0.33	140.1	0%	0	0	100%	0.33	140.1

6. The right to the use of the water is restricted to beneficial use at the places of use described and is subject to all other conditions and limitations contained in Certificate 95971 and any related decree.

Upon filing the Notice of Completion:

7. *Water Right Certificate 95971 is modified as follows by the rate only for uses with an 1895 priority date (the Department will cancel Certificate 95971 and issue a superseding certificate incorporating these modifications when it is determined to be necessary for record keeping):*

**Use:** 5669.21 ACRES FOR IRRIGATION (IR), 46.34 ACRES-EQUIVALENT FOR POND MAINTENANCE (PM), AND LIVESTOCK (LV)

**Priority Dates** 1895

**Rate:** 87.88 CUBIC FEET PER SECOND

The maximum diversion rate by priority date is as follows:

Priority	Acres or Ac-Eq	Maximum Rate (CFS)
1895	5715.55	87.88

**Limit/Duty:** The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-FIFTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated during the irrigation season of each year.

**Source:** WHYCHUS CREEK, tributary of THE DESCHUTES RIVER

**Authorized Place of Use:**

8. *Water use measurement conditions:*

- a. *The water user shall maintain the meters or measuring devices in good working order.*
- b. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

9. *All conserved water shall be managed instream until a Request for Finalization is submitted as follows:*

<i>Priority Date</i>	<i>Period</i>	<i>Rate (cfs)</i>	<i>Volume (acre-feet)</i>
1895	April 1 through October 31	0.33	140.1

*Whychus Creek, a tributary of Deschutes River*

*From the authorized point of diversion at approximately River Mile (RM) 24.5:*

<i>POD</i>	<i>Twp</i>	<i>Rng</i>	<i>Mer</i>	<i>Sec</i>	<i>Q-Q</i>	<i>Measured Distances</i>
1	15 S	10 E	WM	21	SW SW	998 FEET NORTH AND 1211 FET EAST FROM THE SW CORNER OF SECTION 21

*To: the confluence of Whychus Creek at RM 0, and into the mainstem Deschutes River to Lake Billy Chinook at RM 120.*

*Upon Filing the Request for Finalization:*

2305 P 1 170

- 10. *The project is complete, and no additional time is needed for finalization.*
- 11. *The Department shall issue a new instream water right certificate for the conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values as follows:*

<i>Priority Date</i>	<i>Period</i>	<i>Rate (cfs)</i>	<i>Volume (acre-feet)</i>
1895	April 1 through October 31	0.33	140.1

*Whychus Creek, a tributary of Deschutes River*

<i>Priority Date</i>	<i>Period</i>	<i>Location</i>	<i>Rate (cfs)</i>	<i>Volume (AF)</i>
1895	April 1 through October 31	Reach 1: At the authorized POD at approximately RM 24.5 to the mouth of Whychus Creek	0.33	140.1

*Deschutes River, tributary to the Columbia River*

<i>Priority Date</i>	<i>Period</i>	<i>Location</i>	<i>Rate (cfs)</i>	<i>Volume (AF)</i>
1895	April 1 through October 31	Reach 2: From the confluence of Whychus Creek with the Deschutes River to Lake Billy Chinook at RM 120	0.33	140.1

*Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original points of diversion. Stream channel losses and gains calculated based on available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original point of diversion within the specified stream reach.*

*The instream right established by this allocation shall replace a portion of instream water rights established pursuant to ORS 537.341 OR 537.346 and be in addition to instream water rights established pursuant to ORS 537.348 or 537.470 unless otherwise specified in an order approving a new instream water right under these statutes.*

Dated at Salem, Oregon OCT 12 2023

  
 Lisa J. Jaramillo, Transfer and Conservation Section Manager, for  
 DOUGLAS E. WOODCOCK, ACTING DIRECTOR  
 Oregon Water Resources Department
