

5. OID also petitioned water rights acquired by the district. These rights are described by Water Right Certificates 508, 530, 540, 553, 597, 599, 676, 679, 1022, 1079, 1168, 1264, 1291, 1292, 1421, 1658, 1931, 3277, 50354, 55977, 56089, 56459, 75210, 75215, 75870, 76282, 76283, and completed transfers authorized by orders approving Transfer Applications T-5941, T-7604, T-7605, T-7873, T-7874 and T-8648. These rights are petitioned as diminished from irrigation to supplemental irrigation and relocated to align with petitioned irrigation project rights. In addition, OID petitioned to diminish the duty of water for Certificates 50354 and 55977 from 6.0 to 4.0 acre feet per acre per irrigation season.
6. OID petitioned the rights described by Certificates 13456, 14327, 21955, 28812, 49767, 51126, 52179, 75490 and 75900. These rights are referred to as non-project rights and are petitioned as rights to be diminished from irrigation to supplemental irrigation and relocated to align with petitioned irrigation project rights.
7. OID petitioned the rights described by Certificates 23656, 23840, 28814, 28816, 30932, 52752 and 52957. These rights are referred to as non-project rights and are for supplemental irrigation petitioned as rights to be relocated to align with petitioned irrigation project rights.
8. The location and use of the petitioned water rights are described in Table 2.
9. The authorized rate of diversion for the petitioned water rights is summarized as follows:

AUTHORIZED DIVERSION (CUBIC FEET PER SECOND)		
CERTIFICATES & TRANSFERS	CFS	SOURCES
68394	209.700	Ochoco, McKay, Dry & Johnson Creeks, Wastewater, Ochoco Reservoir
68395	190.000	Crooked River & Prineville Reservoir
76576	2.7500	Ochoco Creek & Ochoco Reservoir
Acquired Rights*	59.930	Crooked River, Ochoco & McKay Creeks
Other Rights*	9.865	Crooked River, Ochoco, Johnson, Juniper & McKay Creeks, Wells, Springs, Reservoirs, Wastewater
TOTAL:	472.245	

* Cumulative total

10. The points of diversion for the petitioned water rights are listed in Table 3.
11. The completed transfers petitioned by OID are listed in Table 1. The location and use of the petitioned completed transfers are described in Table 2.
12. The Department approved Transfer Application T- 9963, submitted by OID, to add additional points of diversion to serve specific parcels of land petitioned under Certificate 68395. The additional points of diversion are described in Table 3. The order approving T-9963, issued March 17, 2006, and recorded in Special Order Volume 68, page 276, specifies approval of the ORS 541.329 petition and map shall constitute satisfactory proof of completion of the additional points of diversion authorized by the transfer approval order.
13. OID's petition and maps include place of use changes proposed by Transfer Applications T-7800, T-T8850 and T-8837 pending before the Department. Transfer Application T-8837 also proposed an additional point of appropriation. Given this, the Department shall contact the

applicants and recommend they withdraw T-7800 and T8850, and amend T-8837 to confine the request to an additional point of appropriation.

14. OID petitioned the water right described by Transfer Application T-8648. The Department inadvertently failed to issue a certificate at the time it approved T-8648 describing the remaining portion of Water Right Certificate 2778 not modified by the transfer. The Department shall issue a certificate describing the remainder of the right not modified by T-8648 to rectify this discrepancy in the water right record.
15. OID has withdrawn pending Transfer Application T-8760 for a change in point of diversion.
16. OID notified the Department that the changes in points of diversion authorized by the order approving Transfer Application T-8714 will not be completed.
17. Table 4 describes the location and use of the water rights petitioned to be canceled. Notice by registered mail pursuant to ORS 541.329(4) and OAR 690-13-150 was sent to the landowners identifying the rights to be canceled.
18. Table 4 also describes the location and use of water rights not modified by the petition. The Department shall issue water right certificates describing the remainder of the water rights not modified by the petition.
19. Water rights not modified by the petition may conflict with petitioned rights. This means that multiple irrigation rights may be located on the same land parcel. Multiple irrigation water rights are not cumulative. Such conflicts shall be resolved by the landowner or district at the time of any subsequent water right transfer. These conflicts may be resolved by the landowner or district canceling all or a portion of a water right or diminishing all or a portion of a water right from irrigation to supplemental irrigation. Alternatively, in processing a transfer application where multiple irrigation rights exist for the same land parcel, the Department shall designate the right with the oldest priority date as the primary irrigation right and diminish all other rights to supplemental irrigation unless the applicant specifies otherwise.
20. The acquired water rights described by Water Right Certificates 540, 599 and 679 are petitioned as supplemental irrigation. These water rights contain multiple priority dates for a specified number of acres within a single tract of land, but do not describe by priority date the specific lands to which the water right is appurtenant. The petition clarified the priority date appurtenant to specific land parcels in most such situations. However, the priority date appurtenant to specific land parcels could not be identified and clarified within the larger tract of land. For these water rights, the landowner or district shall clarify the priority date appurtenant to a specific land parcel proposed for transfer at the time of any subsequent water right transfer.
21. The Department has reviewed the petition and maps submitted by the District. Staff's report on its findings is on file at the Department. Based upon its review and report, the Department finds:
 - a. OID is a "district" as defined in ORS 541.325(1)
 - b. OID has met the notice requirements of ORS 541.325(4)
 - c. OID filed its petition and maps in a timely manner.
 - d. OID paid the fees required under ORS 536.050(1)(m)
 - e. OID certified that the notice requirements of ORS 541.325(4) were met.

- f. The acreage petitioned is within the limits of the eligible water rights and the limits set forth in ORS 541.331(4).
- g. The petition does not expand the total rights of record of the district.
- h. The proposed changes result in no injury to existing water rights.
- i. The content and quality of OID's petition and maps meet the requirements of ORS 541.331(4).

Conclusions of Law

The petition and maps submitted by Ochoco Irrigation District comply with the requirements of ORS 541.325 to ORS 541.333.

Now, therefore, it is ORDERED:

1. The Department approves Ochoco Irrigation District's petition and maps of water rights.
2. The Department shall issue new confirming water right certificates conforming to the approved petition for:
 - irrigation of 19,701.6 acres;
 - supplemental irrigation of 17,469.37 acres; and
 - industrial/manufacturing use for 360.2 equivalent irrigation acres.
3. The Department shall issue new certificates to describe that portion of those rights not diminished or canceled.
4. The new certificates shall retain the appropriate conditions and limitations upon the rights, seasons of use, priority dates, and rate and duty limitations. The following reference table identifies the new certificates resulting from approval of the petition:

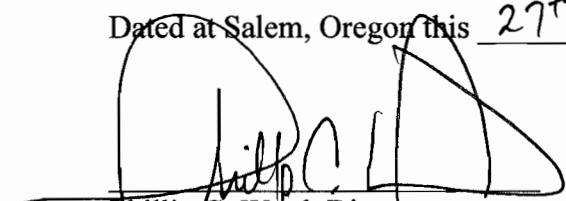

Type of Water Right	Pre-Petition Water Right Certificate	Post-Petition Water Right Certificate	
		Petitioned Water Right	Un-Modified Water Right

	52752	82270	
	52957	82271	

5. The water rights listed as *Water Rights to be Canceled* in Table 4 are canceled.
6. The water rights listed in Table 1 as *Acquired Rights* and *Non-Project Irrigation with Project Supplemental* are diminished from irrigation to supplemental irrigation. In addition, the duty of water for the *Acquired Rights* described by pre-petition Water Right Certificates 50354 and 55977 are diminished from 6.0 to 4.0 acre feet per acre per irrigation season. The legal description describing the petitioned place of use for these rights appears in Table 2.
7. The application of water to beneficial use was completed to the extent authorized under the terms of the final orders approving Transfer Applications T-5941, T-6093, T-6094, T-6150, T-7128, T-7604, T-7605, T-7873, T-7874, T-8467, and T-8648.
8. The points of diversion for the rights affected by Transfer Application T-8714 are reverted to the authorized points of diversion listed in the post-petition water right certificates.
9. Transfer Application T-8760 is withdrawn.

10. Ochoco Irrigation District's petition and maps constitute satisfactory proof of completion of additional points of diversion authorized by the order approving Transfer Application T-9963, entered April 17, 2006, and recorded in Special Order Volume 68, page 276.

Dated at Salem, Oregon this 27th day of July, 2006.
