Transfer Review Criteria [OAR 690-380-4010(2)]

10. Water has been used within the last five years according to the terms and conditions of the rights, and there is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
11. A diversion structure and ditch sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-9144.
12. The proposed change would not result in enlargement of the right.
13. The proposed change would not result in injury to other water rights.

Conclusions of Law

The change in point of diversion proposed in application T-9144 is consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in point of diversion proposed in Transfer Application T-9144 is approved.
2. Water right certificate 55920 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer and transfer application T-9149.
3. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 55920 and any related decree.
4. The quantity of water diverted at the new point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.
5. The water user shall maintain and operate a fish screening and/or by-pass device, as appropriate, at the point of diversion consistent with the Oregon Department of Fish and Wildlife's operational and maintenance standards.
6. Prior to diverting water, the water user shall install an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain and operate the measuring device as required by the Department.
7. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2009. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

8. When satisfactory proof of the completed change is received, a new certificate confirming the right transferred will be issued.
