Oregon Revised Statute (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Transfer Application Transfer Review Criteria (OAR 690-380-4010)

13. Water has been used within the last five years prior to the submittal of Transfer Application T-11843 according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
14. A well, pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-11843.
15. The Department has determined that the proposed change to two new points of appropriation would develop the same ground water aquifer as the authorized point of appropriation. Under OAR 690-380-2110, any request for a change in point of appropriation is restricted to the same aquifer.
16. The proposed change would not result in enlargement of the right.
17. The proposed change would not result in injury to other water rights.
18. All other application requirements are met.

Partial Cancellation of a Water Right

19. The Department has determined that the use of water for irrigation under portions of Certificate 46732 have not been exercised for a great many years on parcels now occupied by homes, a lane and driveways, and asked the landowners to concur. These portions of the water right should likely be cancelled. To accomplish this, the Department has provided "Partial Cancellation of a Water Right" voluntary cancellation affidavits for their concurrence.

20. On April 20, 2015, the Department received voluntary cancellation affidavits from Steve and Patricia Malcom (Tax Lot 501), and Arlene M. Malcom (Tax Lot 500), requesting to cancel portions of Certificate 46732 appurtenant to Tax Lots 500 and 501, within Section 3, Township 1 North, Range 32 East, W.M.

21. The portions of the right proposed to be cancelled are described as follows:

Certificate: 46732 the name of BRUCE A. MALCOM (perfected under Permit G-5865)
Use: IRRIGATION OF 0.13 ACRES (TL 500) AND 0.30 ACRES (TL 501)
Priority Date: JUNE 28, 1973
Rate: 0.0016 CUBIC FEET PER SECOND (CFS) FOR TL 500 AND 0.0036 CFS FOR TL 501
Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Conclusions of Law

The change in points of appropriation proposed in Transfer Application T-11843 is consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000 and the abandoned portions of the water right should be cancelled.

Now, therefore, it is ORDERED:

1. The change in points of appropriation proposed in Transfer Application T-11843 is approved. The portions of the right that have been abandoned are cancelled.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 46732 and any related decree.

3. Water right Certificate 46732 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer.
4. The quantity of water diverted at the new points of appropriation, together with that diverted at the original point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.
5. Water shall be acquired from the same aquifer (water source) as the original point of appropriation. New proposed existing Well#1 (UMAT 53616/TL 501) shall not be deepened. Proposed Well #2 on Tax Lot 502 shall be constructed similarly to produce water from the same aquifer as the original well (UMAT 227) on Tax Lot 500 and UMAT 53616, Tax Lot 501.
6. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2018**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
7. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.
