Transfer Review Criteria [OAR 690-380-4010(2)]

10. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
11. A diversion structure and ditch sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11836.

12. The proposed change would not result in enlargement of the rights.
13. The proposed change would not result in injury to other water rights.

Conclusions of Law

The change in place of use proposed in Transfer Application T-11836 is consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in place of use proposed in Transfer Application T-11836 is approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 80854 and 80855 and any related decree.
3. Water right Certificates 80854 and 80855 are cancelled.
4. The former place of use of the transferred rights shall no longer receive water under the rights.
5. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2018**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
6. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.
