Temporary Transfer Review Criteria

9. Water has been used within the last five years according to the terms and conditions of the rights.
10. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
11. The proposed changes would not result in enlargement of the rights.
12. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary changes in place of use and points of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-13222 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in place of use and change in points of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-13222 are approved.
2. The former place of use **shall not** be irrigated as part of these water rights during the 2019, 2020, 2021, 2022, and 2023 irrigation seasons.
3. The use shall revert to the authorized place of use at the end of the 2024 irrigation season.
4. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
5. The approval of this temporary transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
6. A subsequent application for permanent transfer of Certificates 26578 and 32343 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 26578 and 32343.
8. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
9. The use of the remaining water rights described by Certificates 26578 and 32343 shall continue to be in accordance with the terms and conditions of Certificates 26578 and 32343.
