Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
- The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-3846 (Certificate of Registration GR-3503) and any related decree.

4. The quantity of water diverted at the new point of appropriation shall not exceed the quantity of water lawfully available at the original point of appropriation.
5. The former place of use of the modified ground water registration shall no longer receive water as part of the ground water certificate of registration.
6. The Director may require the water user to install a totalizing flow meter or other suitable measuring devices at each new point of appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.
