12. The proposed modifications would not result in enlargement of the ground water registration.
13. The proposed modifications would not result in a state Scenic Waterway not receiving previously available water during periods in which streamflows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.

Conclusion of Law

The additional point of appropriation proposed in Ground Water Registration Modification Application T-12494 is consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000.

Now therefore, it is ordered:

1. The modifications to Registration Application GR-2814 (Certificate of Registration GR-2655) and Registration Application GR-533 (Certificate of Registration GR-510) are recognized. Recognition of the modifications shall not be construed as a final determination of the right to appropriate ground water under the certificate of registrations or modifications. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-2814 (Certificate of Registration GR-2655) and Registration Application GR-533 (Certificate of Registration GR-510) and any related decree.
3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
4. The quantity of water diverted at the additional point of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
