for the irrigation of 2.0 acres in SW $\frac{1}{4}$ NW $\frac{1}{4}$, Section 10, Township 9 South, Range 25 East, W.M., with a date of priority of June 21, 1927, is approved.

It is FURTHER ORDERED that the quantity of water diverted at the new point of diversion shall not exceed the quantity of water available at the old point of diversion, and shall not exceed 0.03 cubic foot per second.

It is FURTHER ORDERED that the following provisions shall be effective when in the judgement of the watermaster it becomes necessary to install headgates and measuring devices.

That the diversion works shall include an in line flow meter, a weir, or other suitable device for measuring the water to which the applicant is entitled.

That the type and plans of the measuring device be approved by the watermaster before the beginning of construction work and that the weir or measuring device be installed under the general supervision of said watermaster.

It is FURTHER ORDERED that the construction work shall be completed and the change in point of diversion of water made on or before October 1, 1976.
