ORS 540.505 to 540.580 establishes the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

2. On January 25, 2005 an amended page 5 of the transfer application was received. The amended copy included Jacquelyn Konnegen's signature.
3. The application contains a scrivener's error when describing the additional point of diversion. The coordinates given locate the proposed point of diversion within the NE ¼ NW ¼ rather than the NW ¼ NW ¼ of section 29.

Conclusions of Law

The proposed changes in point of diversion in application T-8996 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

- The changes in point of diversion proposed in application T-8996 are approved.
- Water right certificates 75604, 75605, and 75606 are cancelled. New certificates will be issued describing those portions of the rights not involved in this transfer and in transfer T-8997.
- The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 75604, 75605, 75606 and any related decree.

4. The proposed change shall be completed on or before October 1, 2006.
5. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department by October 1, 2007.
6. The quantity of water diverted at the additional point of diversion, together with that diverted at the old point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.
7. Prior to diverting water, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
8. The water user shall install and maintain a fish screen or fish by-pass device, as appropriate, at the new point of diversion. The type and plans of the screen or by-pass device must be approved by the Oregon Department of Fish and Wildlife prior to beginning of construction, and shall be installed under the supervision of the Department of Fish and Wildlife. The water user may participate in the Department of Fish and Wildlife's cost-sharing program for installation of screening and by-pass devices in accordance with ORS 540.525.
9. When satisfactory proof of the completed changes is received, new certificates confirming the rights transferred will be issued.
