**Conclusions of Law**

The change in point of appropriation of Well 2 proposed by Permit Amendment Application T-10419 is consistent with the requirements of ORS 537.211.

**Now, therefore, it is ORDERED:**

The change and subsequent use of water shall be subject to the following conditions:

1. The quantity of water diverted at the new point of appropriation (Well 3), together with that diverted at Well 1, shall not exceed the maximum rate and duty allowed under Permit G-15347.
2. Prior to water use from the proposed point of appropriation, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, and shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

3. Water shall be acquired from the same aquifer as the original point of appropriation.
4. All other terms and conditions of Permit G-15347 remain the same.

5. Permit G-15347, in the name of Driscoll Strawberry Association, Inc., is amended as described herein.
