Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

BEAVER WATER DISTRICT
PO BOX 122
BEAVER, OR 97112

Findings of Fact

1. On August 5, 2016, Beaver Water District filed an application to change the point of diversion, place of use and character of use under Certificate 15777 and to change the place of use under Certificate 82602. The Department assigned the application number T-12457.
2. Notice of the application for transfer was published on August 16, 2016, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On April 19, 2017, the Department contacted the applicant with a deficiency in the application. Certificate 82602 was proposed to be included in the transfer application. However, on May 18, 2017, the agent requested removal of Certificate 82602 from the application.
4. On June 1, 2017, the Applicant submitted a revised application map removing reference to Certificate 82602.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

5. On June 8, 2017, the Department contacted the applicant with a deficiency in the revised application map. The revised map does not show the location of the proposed point of diversion. On June 14, 2017, the Department received a revised application map.
6. On August 17, 2017, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12457 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of September 18, 2017, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
7. On October 19, 2017, the Department issued a Preliminary Determination proposing to approve Transfer Application T-12457 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published in the Department's weekly notice on October 24, 2017, and in the Tillamook Headlight-Herald newspaper on October 25 and November 1, 2017, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

Transfer Review Criteria [OAR 690-380-4010(2)]

14. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
15. A diversion structure and pipelines sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-12457.
16. The proposed changes would not result in enlargement of the rights.
17. The proposed change would not result in injury to other water rights.

Conclusions of Law

The change in point of diversion, place of use, and character of use proposed in Transfer Application T-12457 is consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in point of diversion, place of use, and character of use proposed in Transfer Application T-12457 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 15777 and any related decree.
3. Water right Certificate 15777 is cancelled.
4. The quantity of water diverted at the new point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion on Hester Creek.
5. Water use measurement conditions:
 - a. **Before water use may begin** under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each new point of diversion.
 - b. The water user shall maintain the meter or measuring device in good working order.
 - c. The water user shall allow the Watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the Watermaster shall request access upon reasonable notice.
6. The water user shall operate and maintain an approved fish screen at the new point of diversion. If Oregon Department of Fish and Wildlife (ODFW) determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2019**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
8. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.
