Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

8. A change in point of diversion is necessary to convey the water to the proposed temporary place of use. Temporary Transfer Application T-13815 proposes to move the authorized point of diversion approximately 7.8 miles downstream to:

| Twp | Rng | Mer | Sec | Q-Q | Measured Distances |

| 9 S | 4 W | WM | 29 | NE SW | 1000 FEET NORTH AND 100 FEET WEST FROM THE SE CORNER OF DLC 46 |

Temporary Transfer Review Criteria

9. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
10. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
11. The proposed changes would prevent the lands from which the water right is removed during the period of the temporary transfer from receiving water under the transferred rights, as required by ORS 540.523(7).
12. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary changes in place of use and points of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-13815 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in place of use and change in points of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-13815 are approved.
2. The former place of use **shall not** be irrigated as part of these water rights during the 2021, 2022, 2023, 2024, and 2025 irrigation seasons.
3. The use shall revert to the authorized place of use at the end of the 2025 irrigation season. The authorization to use the additional point of diversion shall be terminated concurrently.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
5. A subsequent application for permanent transfer of Certificates 26578 and 32343 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 26578 and 32343.

7. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
8. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion.
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
9. The use of the remaining water rights described by Certificates 26578 and 32343 shall continue to be in accordance with the terms and conditions of Certificates 26578 and 32343.
