It is FURTHER ORDERED that the following provisions shall be effective when in the judgement of the watermaster it becomes necessary to install headgates and measuring devices.

That the diversion works shall include an in-line flow meter, a weir, or other suitable device for measuring the water to which the applicant is entitled.

That the type and plans of the measuring device be approved by the watermaster before the beginning of construction work and that the weir or measuring device be installed under the general supervision of said watermaster.

It is FURTHER ORDERED that certificate of water right heretofore issued to Clifford R. Nybakke and recorded at page 20111, Volume 14, State Record of Water Right Certificates, is canceled, and in lieu thereof a new certificate be issued covering the balance of the lands not involved in this proceeding and upon receipt of proof satisfactory to the State Engineer of completion of the authorized change in point of diversion, a certificate of water right shall be issued to Gerald L. Larson confirming the change in point of diversion.
