9. The proposed modification would not result in enlargement of the ground water registration.

Conclusions of Law

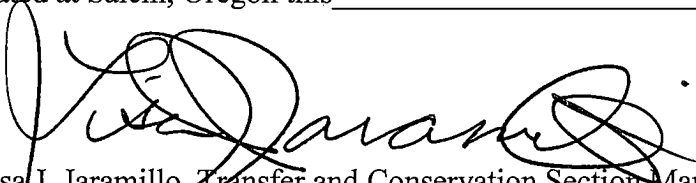

The modification in point of appropriation proposed in Ground Water Registration Modification T-13057 is consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000.

Now, therefore, it is ORDERED:

1. The modification to Registration Application GR-1858 (Certificate of Registration GR-1799) proposed in Ground Water Registration Modification Application T-13057 is recognized. Recognition of the modification shall not be construed as a final determination of the right to appropriate ground water under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-1858 (Certificate of Registration GR-1799) and any related decree.
3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
4. Water shall no longer be appropriated from the original point of appropriation as part of this ground water certificate of registration.

5. The quantity of water diverted at the new point of appropriation (New Well 1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Pump Well No. 1).
