Mr. Robert W. DeBow, Watermaster of District No. 7, has filed a statement to the effect that the proposed change in point of diversion may be made without injury to existing rights.

No objection having been filed and it appearing that the proposed change in point of diversion may be made without injury to existing rights, the application should be approved.

NOW, THEREFORE, it hereby is ORDERED that the requested change in point of diversion from South Fork Wallowa River (Lostine) described herein, without loss of priority, is approved.

It is FURTHER ORDERED that the quantity of water diverted at the new point of diversion shall not exceed the quantity of water available for the lands described herein at the old point of diversion.

It is FURTHER ORDERED that the following provisions shall be effective when in the judgement of the watermaster it becomes necessary to install headgates and measuring devices:

That the diversion works shall include an in line flow meter, a weir, or other suitable device for measuring the water to which the applicant is entitled;

That the type and plans of the measuring device be approved by the watermaster before the beginning of construction work and that the weir or measuring device be installed under the general supervision of said watermaster.

It is FURTHER ORDERED that the construction work shall be completed and the change in point of diversion of water made on or before October 1, 1978.

It is FURTHER ORDERED that the certificate of water right heretofore issued to Minnie E. Allen and W. C. Boatman and recorded at Page 2940, Volume 4, State Record of Water Right Certificates, is canceled, and in lieu thereof a new certificate be issued covering the balance of the right not involved in this proceeding, and upon proof satisfactory to the Water Resources

Director of completion of works and beneficial use of water to the extent intended under the provisions of this order, a confirming certificate of water right shall be issued to the applicant herein.
