

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of Instream Lease Application) DETERMINATION and FINAL ORDER ON
IL-2035, Umatilla County) PROPOSED INSTREAM LEASE

Authority

Oregon Revised Statute (ORS) 537.348 establishes the process in which a water right holder may submit a request to lease an existing water right for instream purposes. Oregon Administrative Rule (OAR) Chapter 690, Division 077 implements the statutes and provides the Department's procedures and criteria for evaluating instream lease applications.

Lessor

Larry & Becky Hoeft
68060 Highway 395 South
Pendleton, OR 97801

Lessee

Trout Unlimited
Attn: Aaron Penvose
621 Main Street, Suite C
Lewiston, ID 83501

Findings of Fact

1. On April 30, 2024, Larry & Becky Hoeft and Trout Unlimited filed an application to lease the entirety of Certificate 2616 for instream use. The Department assigned the application number IL-2035.

2. The right to be leased is as follows:

Certificate: 2616 in the name of Frank E. Sherman (confirmed by Umatilla River Decree in Volume 3, Page 127)

Use: Irrigation of 57.5 acres

Priority Date: 1904

Quantity: **Rate:** 0.72 Cubic Foot per Second (CFS)

Limit: The amount of water to which such right is entitled and hereby confirmed for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes, subject to the provisions of paragraph 33 of said decree and all conditions and limitations contained in said decree.

Source: Birch Creek, tributary to Umatilla River

Authorized Point of Diversion (POD): Not identified on certificate.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Authorized Place of Use:

Twp	Rng	Mer	Sec	Q-Q	Acres
1 N	32 E	WM	34	NW NE	16.5
1 N	32 E	WM	34	SW NE	6.0
1 N	32 E	WM	34	SE NW	21.0
1 N	32 E	WM	34	NE SW	14.0
Total Acres					57.5

3. Certificate 2616 does not provide a description of the location of the point of diversion. Based upon additional information provided by the Lessor, for purposes of this instream lease, the point of diversion is described as follows:

Twp	Rng	Mer	Sec	Q-Q	LATITUDE/LONGITUDE
1 N	32 E	WM	34	NW SW	LATITUDE: 45.3116 LONGITUDE: -118.4886 RIVERMILE 13

4. Certificate 2616 does not specify an irrigation season. However, the Umatilla River Decree establishes the irrigation season for the area as March 1 through October 31.
5. Certificate 2616 does not specify a rate or duty per acre; however, the Umatilla River Decree specifies the rate limit as one-eightieth CFS per acre. The duty requested in the application equals to 4.0 acre feet per acre, the Department agrees this is an appropriate duty limit per acre for the purposes of this instream lease.
6. The lease application includes the information required under OAR 690-077-0076(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(1). No comments were received.
7. At the full instream rate and volume requested, water may only be protected instream for 161 days. The full instream period requested by the Lessor and Lessee, April 1 through October 31, is 214 days. To prevent enlargement of the right, the requested instream use requires modification.
8. The instream use has been modified from the lease application to prevent injury and enlargement and is as follows:

Birch Creek, tributary to Umatilla River

Instream Reach: From the POD (as described in Finding of Fact No. 3) to the confluence with Umatilla River

Certificate	Priority Date	Instream Rate (CFS)	Instream Volume (AF)	Period Protected Instream
2616	1904	0.54	230.0	April 1 to October 31

9. Other conditions to prevent injury and enlargement are:

Water rights upstream of the original point of diversion shall not be subject to regulation for flows in excess of the quantities to which this instream water right is entitled at the original point of diversion.

Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original point of diversion. Stream channel losses and gains calculated based on the best available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original points of diversion within the specified stream reach.

10. The amount and timing of the proposed instream flow is allowable within the limits and use of the original water right.
11. The protection of flows within the proposed reach is appropriate, considering:
 - a. The instream water use begins at the recorded point of diversion;
 - b. The location of confluences with other streams downstream of the point of diversion.
 - c. There are no known areas of natural loss of streamflow to the river bed downstream from the point of diversion; and
 - d. Any return flows resulting from the exercise of the existing water right would re-enter the river downstream of the reach of the instream water right.
12. The total monthly quantities of water to be protected under the existing and proposed instream rights in the reach will provide for a beneficial purpose.
13. The total monthly quantities of water to be protected instream under existing and proposed instream rights in the reach do not exceed the estimated average natural flow.
14. If approved, this instream lease is not reasonably expected to significantly affect land use as prescribed by ORS 197.180, OAR Chapter 660, Divisions 30 and 31, and OAR Chapter 690, Division 5.
15. Based upon review of the application, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. The order approving this instream lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
16. If a right which has been leased is later proposed to be leased again, transferred and/or reviewed under an allocation of conserved water, a new injury review shall be required. For example, instream transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of any future transactions.

17. The Lessor and Lessee have requested that the lease terminate on October 31, 2024. The lease may commence on the date this final order is signed.

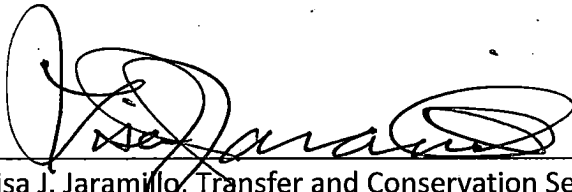

Conclusions of Law

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

Now, therefore it is ORDERED:

1. The Lease as described herein is APPROVED.
2. During the term of the lease, the former place of use will no longer receive water as part of these rights, any supplemental rights, or any other layered irrigation water rights, including ground water registrations and permits.
3. The term of the lease will commence upon approval of the instream lease and terminate on October 31, 2024.

Dated at Salem, Oregon this day JUN 12 2024.

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for
Douglas E. Woodcock, Acting Director
Oregon Water Resources Department
