Findings of Fact

1. Farmers Irrigation District filed an application to lease a portion of Certificate 74306 to instream use. The Department assigned the application number IL-802.
2. On April 5, 2007, the Department issued an order approving this instream lease application, as evidenced by Special Order Volume 71, Page 437. Following issuance of this order a scrivener’s error was identified describing when the lease would terminate. This order is being issued to correctly describe that the lease terminated on September 30, 2007 and supersedes Special Order Volume 71, Page 437.

4. The lease application includes the information required under OAR 690-077-0077(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(6). No comments were received.

5. The instream use has been modified from the lease application to prevent injury and enlargement and is as follows:
HOOD RIVER tributary to COLUMBIA RIVER

Instream Reach: From POD (as described in Finding of Fact #3) at approximately River Mile 11.25 to the to the mouth of the Hood River

Certificate	Priority Date	Instream Rate (cfs)	Period Protected Instream
74306	MAY 7, 1906	0.62	June 1 through September 29

6. Other conditions to prevent injury and enlargement are:
Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original point of diversion. Stream channel losses and gains calculated based on available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original point of diversion within the specified stream reach.

7. Based upon review of the application, comments received, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. This finding is made through an abbreviated review recognizing that the lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.

8. If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077-0070 or OAR 690-077-0075 a new injury review shall be required. Transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of future leases or transfers.

9. The application requests that the lease commence on April 15, 2007 and terminate on April 15, 2008. Since the irrigation season ends on September 30, 2007, no water could be protected instream by this lease in 2008.

10. The lease will commence on April 15, 2007 and terminate on September 30, 2007.

CONCLUSIONS OF LAW

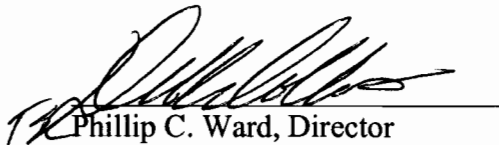

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

ORDER

Therefore, it is ORDERED:

1. That the Lease as described herein is APPROVED.
2. The former place of use will no longer receive water as part of these rights, any supplemental rights, or any ground water registrations for the same use during the term of the lease.
