9. The district permanent transfer application satisfies the criteria of OAR 690-385-4000, contains the information required under OAR 690-385-2000, and includes maps meeting the requirements of OAR 690-385-2200.
10. The water rights are subject to transfer as defined in OAR 690-385-0100(17).
11. The proposed change in place of use would not result in enlargement of the rights.
12. The proposed change in place of use would not result in injury to other water rights
13. The application was not filed prior to the end of the calendar year in which the changes occur as required under ORS 540.580(2). However, the District had notified the Department of the proposed changes in accordance with ORS 540.580(3). The Department's review of the noticed changes found they caused no injury. Having found no injury, the Department was not required to order the District to cease delivery of water or mitigate injury as authorized by ORS 540.580(5). Although the filing date of the application represents a failure to comply with statutory criteria, the late filing does not warrant issuance of notice of violation nor does it produce measurable or irreparable harm to the use of the state's water resources and the public interest.

Conclusions of Law

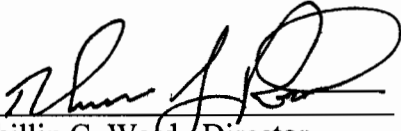

The proposed changes in place of use in Transfer Application T-9624 satisfy the requirements of ORS 540.574(3) and 540.580, with the exception that the application was not received prior to the end of the calendar year in which a change in place of use occurs as required under ORS 540.580(2). *See Finding of Fact #13.*

Now, therefore, it is ORDERED:

1. The proposed changes to the water rights evidenced by Certificates 72279, 72281 and 72283 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 72279, 72281 and 72283 and any related decree.
3. The former place of use shall no longer be irrigated as part of this water right.
4. The proposed change shall be completed on or before October 1, 2006.
5. A Claim of Beneficial Use shall be submitted by the applicant to the Department by October 1, 2007.

6. The Department shall issue a water right certificate on a determination that it is necessary to produce a certificate describing the water right.

Dated at Salem, Oregon this 20th day of July, 2005.
