Transfer Review Criteria [OAR 690-380-4010(2)]

- Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
- A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12947.
- The proposed change would not result in enlargement of the rights.
- The proposed change would not result in injury to other water rights.
- All other application requirements are met.

Conclusions of Law

The change in point of diversion proposed in Transfer Application T-12947 is consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

- The change in point of diversion proposed in Transfer Application T-12947 is approved.
- The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 54029 and 54030 and any related decree.
- Water right Certificates 54029 and 54030 are cancelled. A new certificate will be issued describing that portion of Certificate 54029 not affected by this transfer.
- The quantity of water diverted at the new point of diversion shall not exceed the quantity of water lawfully available at the original points of diversion.
- Water use measurement conditions:
 - Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion.

- b. The water user shall maintain the meter or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2020**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
8. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.
