***Transfer Review Criteria [OAR 690-380-4010(2)]***

11. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610. Certificate 87402 was issued on February 10, 2012, confirming the use of water under Permit 51211.
12. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-9447.
13. The proposed change would not result in enlargement of the right.
14. The proposed change would not result in injury to other water rights.

**Conclusions of Law**

The additional point of diversion proposed in Transfer Application T-9447 is consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

**Now, therefore, it is ORDERED:**

1. The additional point of diversion proposed in Transfer Application T-9447 is approved.

3. Water right certificate 87402 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer.
4. The quantity of water diverted at the additional point of diversion, together with that diverted at the original points of diversion, shall not exceed the quantity of water lawfully available at the original points of diversion.
5. The total diverted for irrigation and supplemental irrigation purposes from the Unnamed Stream, Surface Run-Off, and Reservoirs A, B, C, D, and E is limited to 0.89 cfs, or its equivalent in case of rotation, measured at the points of diversion.
6. Water use measurement conditions:
  - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion from the Unnamed Stream.
  - b. The water user shall maintain the meters or measuring devices in good working order.
  - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2013**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
