### **Conclusions of Law**

The temporary change in place of use proposed in application T-10125 is consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

### **Now, therefore, it is ORDERED:**

1. The change in place of use proposed in application T-10125 is approved.
2. The former place of use **shall not** be irrigated as part of this water right during the 2006 irrigation season.
3. The use shall revert to the authorized place of use at the end of the 2006 irrigation season.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the change causes injury to any existing water right.
5. A subsequent application for permanent transfer of Certificates 80060 and 80061 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 80060 and 80061.
7. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
8. When required by the Department, the water user shall install an in-line flow meter or other suitable device for measuring and recording the quantity of water used. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

9. The use of the remaining water right described by Certificates 80060 and 80061 shall continue to be in accordance with the terms and conditions of Certificates 80060 and 80061.

Dated at Salem, Oregon this 25<sup>th</sup> day of May, 2006.
