

Authorized Point of Diversion (POD):

Twp	Rng	Mer	Sec	Q-Q	Gov't Lot
24 S	7 W	WM	21	NW SW	3

Authorized Place of Use:

Twp	Rng	Mer	Sec	Q-Q	Acres
24 S	7 W	WM	21	NW SW	6.2
24 S	7 W	WM	21	SW SW	0.3
Total Acres					6.5

4. Certificate 88372 does not provide a measured distance for the location of the point of diversion. Based upon additional information provided by the Department's Watermaster, for purposes of this instream lease, the point of diversion is described as follows:

Twp	Rng	Mer	Sec	Q-Q	Gov't Lot	River Mile (RM)
24 S	7 W	WM	21	NW SW	3	85.2

5. Certificate 88372 not specify the irrigation season. Nor is an irrigation season specified by Basin Program or Decree. Consistent with OAR 690-250, for the purposes of instream leasing, an irrigation season of March 1 through October 31 shall be used to establish when water may be protected instream. To avoid injury and enlargement the applicant requested that right be protected instream from July 14 through October 31.
6. The lease application includes the information required under OAR 690-077-0076(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(1). No comments were received.
7. The instream use has been modified from the lease application to prevent injury and enlargement and is as follows:
Umpqua River, tributary to the Pacific Ocean

Instream Reach: From the POD, described in Finding of Fact No. 4 to RM 28.

Certificate	Priority Date	Instream Rate (cfs)	Instream Volume (AF)	Period Protected Instream
88372	May 10, 1962	0.07	16.25	July 14 through October 31

8. The amount and timing of the proposed instream flow is allowable within the limits and use of the original water right.
9. The protection of flows within the proposed reach is appropriate, considering:
- The instream water use begins at the recorded point of diversion;
 - The location of confluences with other streams downstream of the point of diversion.
 - There are no known areas of natural loss of streamflow to the river bed downstream from the point of diversion; and
 - Any return flows resulting from the exercise of the existing water right would re-enter the river downstream of the reach of the instream water right.

10. The total monthly quantities of water to be protected under the existing and proposed instream rights in the reach will provide for a beneficial purpose.
11. The total monthly quantities of water to be protected instream under existing and proposed instream rights in the reach do not exceed the estimated average natural flow.
12. If approved, this instream lease is not reasonably expected to significantly affect land use as prescribed by ORS 197.180, OAR Chapter 660, Divisions 30 and 31, and OAR Chapter 690, Division 5.
13. Based upon review of the application, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. The order approving this instream lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
14. If a right which has been leased is later proposed to be leased again, transferred and/or reviewed under an allocation of conserved water, a new injury review shall be required. For example, instream transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of any future transactions.
15. The Lessor has requested that the lease terminate on October 31, 2019. The lease may commence on the date this final order is signed.
16. The Lessor has requested the option of terminating the lease early with written notice to the Department.

Conclusions of Law

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

Now, therefore it is ORDERED:

1. The Lease as described herein is APPROVED.
2. During each year of the term of the lease, the former place of use will no longer receive water as part of these rights, any supplemental rights, or any other layered irrigation water rights, including ground water registrations and permits.

3. The term of the lease will commence upon approval of the instream lease and terminate on October 31, 2019. For multiyear leases, the lessor *shall* have the option of terminating the lease any time each year with written notice to the Department. However, if the termination request is received less than 30-days prior to the instream use period (July 14 through October 31) or after the water rights' original period of allowed use has begun, the Department may issue an order terminating the lease but use of water may not be allowed until the following calendar year, unless the Director determines that enlargement would not occur.

Dated at Salem, Oregon this 7 day of April, 2015.

Dwight French, Water Right Services Division Administrator, for
Tom M. Byler, Director, Oregon Water Resources Department
