

5. On November 17, 2015, the Department issued a Preliminary Determination proposing to approve Transfer Application T-11821 and sent a copy to the applicants. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on November 24, 2015, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

**Source:** WALLOWA RIVER, a tributary of the GRANDE RONDE RIVER

**Transfer Review Criteria [OAR 690-380-4010(2)]**

9. The quantity of water delivered by the Associated Ditch Companies to the ditches downstream in this reach meets the requirements of the instream right; therefore water is available within the instream reach specified in Certificate 73022.

10. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
11. A diversion structure and ditch sufficient to use the full amount of water allowed under the existing right was present within the five-year period prior to submittal of Transfer Application T-11821.
12. The proposed change would not result in enlargement of the right.
13. The proposed change would not result in injury to other water right.

### **Conclusions of Law**

The change in point of diversion proposed in Transfer Application T-11821 is consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

### **Now, therefore, it is ORDERED:**

1. The change in point of diversion proposed in Transfer Application T-11821 is approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 3024 and any related decree.
3. Water right certificate 3024 is cancelled. A new certificate will be issued describing those portions of the right not affected by this transfer.
4. The quantity of water diverted at the new point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.
5. The water user shall operate and maintain an approved fish screen at the new point of diversion. If Oregon Department of Fish and Wildlife (ODFW) determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.
6. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2022**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.

7. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 5 day of January, 2016.
