- The district temporary transfer application satisfies the criteria of ORS 540.570 and OAR 690-385-3000, contains the information required under OAR 690-385-3200, and includes a map meeting the requirements of OAR 690-385-3300.
- Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
- The water rights are subject to transfer as defined in OAR 690-385-0100(17).

11. The proposed change in place of use would not result in injury to other water rights as defined in OAR 690-385-0100(4).
12. All other applicable requirements for district temporary water right transfers are met.

Conclusions of Law

The temporary change in place of use proposed in Temporary Transfer Application T-13970 is consistent with the requirements of ORS 540.570 and OAR 690-385-3500.

Now, therefore, it is ORDERED:

1. The temporary change in place of use proposed in Transfer Application T-13970 is approved.
2. The lands from which the water right is removed under Certificate 81012 shall receive no water under the transferred right during the 2022 irrigation season.
3. The use shall revert to the authorized place of use after the 2022 irrigation season.
4. Any application for permanent transfer of Certificate 81012 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Divisions 380 or 385. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
5. The time during which water is used on the proposed lands under this approved temporary transfer does not apply toward a finding of forfeiture of Certificate 81012, under ORS 540.610.
6. The water user shall maintain and operate the existing measurement devices and shall make such improvements as may be required by the Department.
7. The use of water under this temporary transfer may be conditioned or revoked at any time to the extent necessary to avoid injury if the Department finds the transfer causes injury to any existing water right.
8. Pursuant to ORS 536.900, a district and user may be subject to civil penalties for allowing the use of water on both the land from which water is transferred, and the lands to which the water is transferred, during the same irrigation season or calendar year.
9. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 81012.

10. The use of the remaining water rights described by Certificate 81012 not involved in this transfer shall continue to be in accordance with the terms and conditions of Certificate 81012.
