6. Certificate 85288 does not specify the irrigation season. However, the Rogue River Decree establishes the irrigation season for the area as April 1 through October 31.
7. Certificate 85288 does not specify a duty limit per acre. However, based on information provided by the applicant, an appropriate duty limit per acre, for purposes of this instream lease, is 3.0 acre-feet per acre considering the quantity of water that could be used beneficially and without waste. This is reflected in the volume specified in Finding of Fact No. 5.
8. Certificate 85288 is a deficient water right. If water were diverted simultaneously to all authorized lands described in the right at the maximum rate and duty allowed at the maximum rate and seasonal volume for the water right would be exceeded. In the event water were diverted simultaneously to all authorized lands described in the right at the maximum rate and duty allowed, the portion of the right involved in this instream lease would be limited as described in the table below, these are also the quantities by which the diversion under Certificate 85288 shall be reduced, if this instream lease is approved.

Instream Rate	Instream Volume
1.50	445.50

9. The portion of the next right to be leased is as follows:

Certificate: 80575 in the name of the Rogue River Valley Irrigation District (perfected under Permit E-19)
Use: Supplemental Irrigation of 52.72 acres
Priority Date: June 24, 1913
Quantity: **Rate:** 0.52 Cubic Foot per Second (CFS)
Volume: 148.5 Acre-Feet (AF)
Limit: The amount of water used for irrigation, together with the amount secured under any other prior right existing for the same lands, is limited to a diversion of One-eightieth of one cubic foot per second (or its equivalent) for each acre irrigated during the irrigation season of each year.

Source: Bear Creek, tributaries to the Rogue River

10. The portion of the second right to be leased is as follows:

Certificate: 85876 in the name of the Rogue River Valley Irrigation District
(perfected under Permit S-407)

Use: Supplemental Irrigation of 165.18 Acres

Priority Date: March 31, 1910

Quantity: **Rate:** 1.65 CFS
Volume: 490.05 AF

Limit: The amount of water used for irrigation is limited to a diversion of ONE-EIGHTH of one cubic foot per second per acre (or its equivalent) for each acre irrigated during the irrigation season of each year.

Source: Four Mile Lake Reservoir within the Klamath Basin; and the waters draining or flowing into the Cascade Canal; and Fish Lake Reservoir with the Rogue River Basin

Total:					165.18	

11. The portion of the right to be leased is as follows:

Certificate: 85877 in the name of Rogue River Valley Irrigation District (confirmed by the Rogue River decree at Volume 14 Page 498)

Use: Supplemental Irrigation of 165.18 acres

Priority Date: June 24, 1913

Quantity: **Rate:** 1.65 Cubic Foot per Second (CFS)

Volume: 490.05 Acre-Feet (AF)

Limit: The amount of water used for irrigation, together with the amount secured under any other prior right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second(or its equivalent) for each acre irrigated during the irrigation season of each year.

Source: Antelope Creek, tributary to Little Butte Creek

Authorized Point of Diversion (POD):

13. The portion of the right to be leased is as follows:

Certificate: 83729 in the name of the U.S. Bureau of Reclamation (constructed under Permit R-2209)

Use: Supplemental Irrigation of 52.72 acres

Priority Date: September 6, 1915

Quantity: **Rate:** 0.52 Cubic Foot per Second (CFS)

Volume: 148.5 Acre-Feet (AF)

Limit: The amount of water used for irrigation together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-FOURTIETH of one cubic foot per second (or its equivalent), and 4.5 acre-feet for each acre irrigated during the irrigation season of each year, PROVIDED that the combination uses of water under permits 25915 and 25916, and all certificates issued in respect thereto, shall not exceed the maximum rate listed for each source above, at any one point in time.

Source: Conde Creek, Dead Indian Creek, Daley Creek, Beaver Dam Creek, tributaries to the South Fork of Little Butte Creek

15. The portion of the right to be leased is as follows:

Certificate: 80577 in the name of Rogue River Valley Irrigation District (perfected under Permit S-2993)
Use: Supplemental Irrigation of 35.2 acres
Priority Date: May 10, 1916
Quantity: **Rate:** 0.35 Cubic Foot per Second (CFS)
Volume: 103.95 Acre-Feet (AF)
Limit: The amount of water used for irrigation together with the amount secured under any other prior right existing for the same lands, is limited to a diversion of ONE-EIGHTITH of one cubic foot per second (or its equivalent) for each acre irrigated during the irrigation season of each year.

18. Certificates involved in this instream lease do not specify the irrigation season; nor is an irrigation season specified by Basin Program or Decree. For the purposes of instream leasing, an irrigation season of March 1 through October 31, consistent with OAR 690-250 shall be used to establish when water may be protected instream.

19. There are supplemental irrigation water rights, appurtenant to all or a portion of the lands described in the above Findings. The Lessors have requested that the Supplemental water rights be included as part of this lease application. The supplemental right will be protected instream in the amounts to which the rights would be available to make up a deficiency.

20. The lease application includes the information required under OAR 690-077-0076(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(1). No comments were received.
21. Portions of the water rights involved in this lease application were involved in Transfer Application T-10715 filed September 30, 2008, and therefore are not subject to forfeiture ORS 540.610 (2)(m).
22. The instream use has been modified from the application and is as follows:

North and South Forks of Little Butte Creeks, tributary to Butte Creek for Certificate 85288 and Fourmile Lake Reservoir, draining or flowing into the Cascade Canal and Fish Lake Reservoir for Certificate 86489

Instream Points: At the points of diversion as described in Finding of Fact Nos 5 ,9 ,10 , 11 ,12 ,13, 14 ,15, 16, and 17.

Certificates		Priority Date	Instream Rate (CFS)	Instream Volume (AF)	Period Protected Instream

-	S-4951	5/9/1910	0.13	39.00	
		Totals:	8.34	2483.22	

23. For the term of this lease, the Supplemental Irrigation rights as described will be protected instream when the Primary Irrigation rights are not available at the rates as described in the above table.
24. Other conditions to prevent injury and enlargement are:
 - A. Water protected instream shall be measured at the Bear Creek Gage, BCMO 143588000.
 - B. RRVID shall divert water at the PODs described in the findings above. Water shall be diverted and transported to Bear Creek in the Joint System Canal and the East Main Canal and then released from the canal through the control structure used to deliver water into Bear Creek for District patrons diverting from Bear Creek.
 - C. RRVID shall maintain a minimum flow through the control structure used to deliver water into Bear Creek by keeping the bottom of the diversion board open, notching the diversion board or other method of passing water that is acceptable to the Watermaster, thereby allowing the leased water to return to Bear Creek at a constant rate.
 - D. The portion of water protected instream under this lease shall be based on the same percentage of diversion and delivery rate that RRVID is diverting to rights

of the same priority within the district. When RRVID is diverting water on a percentage basis, RRVID shall report to the District 13 Watermaster's office the percentage diverted under the July 23, 1909, and March 31, 1910 priority dates. This information only needs to be reported to the Watermaster's office once RRVID is diverting water on a percentage basis (less than 1/100th cfs/acre). Subsequent reports need to be made to the Watermaster's office within one day of when changes are made to the percentage of water being diverted. Once RRVID begins diverting water on a percentage basis, the amount of water leased instream shall be adjusted by that same percentage. In the event that RRVID stops delivery of irrigation water prior to October 1, the Watermaster shall be notified and the delivery for instream use shall stop.

- E. The lessor shall make daily measurements of use during the existing use period. The measuring device shall be an inline flow totalizer that is place in the first length of mainline pipe near the pump, or another device acceptable to the Director. The daily measurements shall be submitted on a monthly basis to the Jackson County Watermaster.
25. The amount and timing of the proposed instream flow is allowable within the limits and use of the original water rights.
 26. The protection of flows at the proposed points is appropriate, considering:
 - a. The instream water use begins at the recorded points of diversion;
 - b. The location of confluences with other streams downstream of the points of diversion.
 - c. There are no known areas of natural loss of streamflow to the river bed downstream from the points of diversion; and
 - d. Any return flows resulting from the exercise of the existing water right would re-enter the river downstream of the points.
 27. The total monthly quantities of water to be protected under the existing and proposed instream rights at the points will provide for a beneficial purpose.
 28. The total monthly quantities of water to be protected instream under existing and proposed instream rights at the points do not exceed the estimated average natural flow.
 29. If approved, this instream lease is not reasonably expected to affect land use significantly as prescribed by ORS 197.180, OAR Chapter 660, Divisions 30 and 31, and OAR Chapter 690, Division 5.
 30. Based upon review of the application, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. The order approving this instream lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
 31. If a right which has been leased is later proposed to be leased again, transferred, and/or reviewed under an allocation of conserved water, a new injury review shall be required. For example, instream transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of any future transactions.

32. The Lessor has requested that the lease terminate on October 1, 2017. The lease may commence on the date this final order is signed.
33. The Lessor has requested that there not be an option to terminate the lease.

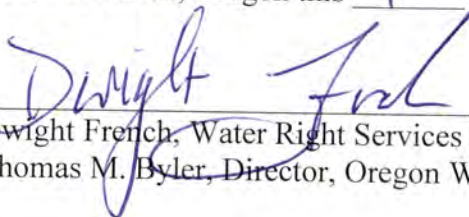

Conclusions of Law

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

Now, therefore it is ORDERED:

1. The Lease as described herein is APPROVED.
2. During the of the term of the lease, the former place of use will no longer receive water as part of these rights, any supplemental rights, or any other layered irrigation water rights, including ground water registrations and permits.
3. The term of the lease will commence upon approval of the instream lease and terminate on October 1, 2017.

Dated at Salem, Oregon this 1 day of Nov, 2017.

Dwight French, Water Right Services Division Administrator, for
Thomas M. Byler, Director, Oregon Water Resources Department
