The amount of water used for irrigation, together with the amount secured under an other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

The right to use the water for the above purpose is restricted to beneficial use on the lands or place of use described

The applicant proposes to change the point of diversion to:

NE $\frac{1}{4}$ SE $\frac{1}{4}$, SECTION 21, T 34 S, R 1 W, W.M.; 150 FEET SOUTH AND 1290 FEET WEST OF THE E $\frac{1}{4}$ OF SECTION 21.

2. The quantity of water diverted at the new point of diversion, together with that diverted at the old points of diversion, shall not exceed the quantity of water lawfully available at the original points of diversion.
3. When required by the Department, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
4. Water shall be acquired from the same surface water source as the original point of diversion.

Certificate 51455 is cancelled. A new certificate will be issued to confirm that portion of the right NOT involved in this transfer. When satisfactory proof of the completed change is received, a new certificate confirming this water right will be issued.
