The order of the Water Resources Director, entered February 10, 1999, at Special Order Volume 53, Page 284, incorrectly listed the authorized quantity of water for Permit G-6422 as 0.96 cubic foot per second. This order correctly lists the authorized quantity as 0.81 cubic foot per second, and should replace the original order.

THESE CHANGES TO EXISTING WATER RIGHTS MAY BE MADE PROVIDED THE FOLLOWING CONDITIONS ARE MET BY THE WATER USER:

1. The proposed changes shall be completed on or before October 1, 2000.
2. The quantity of water diverted at the new points of appropriation (wells), together with the quantity diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available from the original points of appropriation.
3. When required by the Department the water user shall install an in-line flow meters or other suitable devices for measuring and recording the quantity of water used. The type and plans of the measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
4. Water shall be acquired from the same aquifer as the original points of appropriation.
5. The former place of use shall no longer be irrigated as part of this water right.

The order of the Water Resources Director, entered February 10, 1999, at Special Order Volume 53, Page 281, is rescinded. This corrective order is issued in its place.

Certificates 47311 and 47312 are cancelled. When satisfactory proof of the completed changes is received, new certificates confirming these water rights will be issued.

Director, affixed APR 16 1999.
