8. Temporary Transfer Application T-12890 also proposes to temporarily add additional points of appropriation to convey the water to the temporary place of use. The three additional points of appropriation, located an average of approximately 1.9 miles northeast from the authorized point of appropriation, are located as follows:

9. Temporary Transfer Application T-12890 proposes to temporarily transfer water rights within the boundaries of Teel Irrigation District. The district was notified of the proposed temporary transfer and indicated that the district did not object to the transfer.

Temporary Transfer Review Criteria

10. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
11. Wells, pumps, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.

12. The Department has determined that the proposed additional points of appropriation will develop the same source (aquifer) of water as the authorized existing point of appropriation and are within the same subarea of the State Gulch Critical Ground Water Area.
13. The proposed changes would not result in enlargement of the rights.
14. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary changes in place of use and additional points of appropriation to serve the temporary places of use proposed in Temporary Transfer Application T-12890 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary changes in place of use and additional points of appropriation to serve the temporary places of use proposed in Temporary Transfer Application T-12890 are approved.
2. The former places of use **shall not** be irrigated as part of these water rights during the 2018 irrigation season.
3. The use shall revert to the authorized place of use at the end of the 2018 irrigation season. The authorization to use the temporary point of appropriation shall be terminated concurrently.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
5. A subsequent application for permanent transfer of Certificates 76263 and 79993 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. Water use measurement conditions:
 - a. Prior to diversion of water, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted at each new point of diversion.
 - b. The type and plans of the headgate and measuring device(s) must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain the meter or measuring device(s) in good working order.

- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 76263 and 79993.
8. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
9. The use of the remaining water right described by Certificates 76263 and 79993 shall continue to be in accordance with the terms and conditions of Certificates 76263 and 79993.
