Transfer Review Criteria (OAR 690-380-4010)

7. Water has been used within the last five years prior to the submittal of Transfer Application T-11018, according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
8. A well, pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-11018.
9. The Department has determined that the proposed point of appropriation (UMAT 56094), will develop the same source of water as the authorized existing well (UMAT 102). The

existing well produces water from a confined Columbia River basalt group. The proposed new well shall only appropriate ground water from same basalt ground water reservoir consistent with OAR 690-380-2110 (2).

10. The proposed change would not result in enlargement of the right.
11. The proposed change would not result in injury to other water rights.

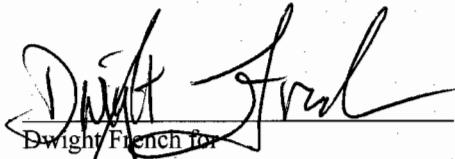

Conclusions of Law

The change in point of appropriation proposed in Transfer Application T-11018 is consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000

Now, therefore, it is ORDERED:

1. The change in point of appropriation proposed in Transfer Application T-11018 is approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 83663 and any related decree.
3. Water right Certificate 83663 is cancelled. Certificate 86858 will be issued describing that portion of the right not affected by this transfer.
4. The quantity of water diverted at the new point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.
5. Water shall be acquired from the same aquifer (Columbia River Basalt) as the original point of appropriation (UMAT 102).
6. The Director may require the water user to install a totalizing flow meter or other suitable measuring devices at each point of appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.
7. The approved change shall be completed and full beneficial use of the water shall be made on or before **October 1, 2012**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
8. When satisfactory proof of the completed change is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 28 day of February, 2011.
