2. Billie Estridge is the receiving landowner who will be responsible for completion of the changes.

4. On April 17, 2014, the Oregon Department of Fish and Wildlife commented on the pending Instream Water Right Application IS-70354 as being injured by Transfer Application T-11740. Since IS-70354 is a water right application, by definition, it is not subject to injury.
5. On June 3, 2014, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11740 to the applicant and receiving landowner. 6. On September 4, 2014, the Department issued a preliminary determination proposing to approve Transfer T-11740 and mailed a copy to the applicant. Additionally, notice of the preliminary determination for the transfer application was published on the Department's weekly notice on September 9, 2014, and in the Central Oregonian newspaper on September 9 and 16, 2014, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.
7. The portion of the right to be transferred is as follows:

**Authorized Points of Diversion:**

2	14 S	14 E	WM	21	SW SE	1.0
1	14 S	14 E	WM	21	SE SE	1.8
Total						15.0

8. Certificate 87549 does not describe measured distance of POD 2, however information is available from the applicant and from Certificate 83443, indicating that the point of diversion is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
14 S	14 E	WM	23	NE SE	POD 2: 950 FEET SOUTH AND 1060 FEET WEST FROM THE E 1/4 CORNER OF SECTION 23

This diversion may be eligible for screening cost-share funds.

***Transfer Review Criteria [OAR 690-380-4010(2)]***

12. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
13. A diversion structure sufficient to use the full amount of water allowed under the existing right was present within the five-year period prior to submittal of Transfer Application T-11740.
14. The proposed changes would not result in enlargement of the right.
15. The proposed changes would not result in injury to other water rights.

**Conclusions of Law**

The change in points of diversion and change in place of use proposed in Transfer Application T-11740 are consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

**Now, therefore, it is ORDERED:**

1. The change in points of diversion and change in place of use proposed in Transfer Application T-11740 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 87549 and any related decree.
3. Water right Certificate 87549 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer.

4. The quantity of water diverted at the new point of diversion, together with that diverted at the original points of diversion, shall not exceed the quantity of water lawfully available at the original points of diversion.
5. Water use measurement conditions:
  - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each new point of appropriation.
  - b. The water user shall maintain the meter or measuring device in good working order.
  - c. The water user shall allow the Watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.
7. The former place of use of the transferred right shall no longer receive water under the right.
8. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2016**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
9. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 16 day of October, 2014.
