)	DIVERSION AND PLACE OF USE

Authority

ORS 540.505 to 540.580 establishes the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

FRED AND TERESA NETTER
15082 OTTAWAY ROAD

Agent

PACIFIC HYDRO-GEOLOGY, INC.

Findings of Fact

Background

1. On December 1, 2005, Fred and Teresa Netter filed an application to change the place of use and point of diversion under Certificates 22661, 27877 and 27878. The Department assigned the application number T-10029.
2. On April 24, 2007, the applicant's agent (Pacific Hydro-Geology, Inc.) submitted a revised application and map to resolve discrepancies involving the location of a portion of the irrigated land under Certificate 22661.
3. The original evidence of use affidavit submitted with the transfer application on December 1, 2005, contained a typographical error. Therefore, on May 15, 2007, the applicant submitted a revised evidence of use affidavit to correctly describe the location where water use occurred under the water rights involved in this transfer.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. Certificate 22661 describes the authorized place of use as 0.6 acre in the NE ¼ SE ¼, 7.2 acres in the NW ¼ SE ¼, 17.8 acres in the SW ¼ SE ¼, and 4.4 acres in the SE ¼ SE ¼ of Section 13, Township 4 South, Range 1 West of W.M., Marion County, Oregon.
- a) The revised transfer application and map for Transfer T-10029 depict the place of use under Certificate 22661 as being 1.1 acres in the NE¼ SE¼, 9.7 acres in the NW¼ SE¼, 16.1 acres in the SW¼ SE¼, and 3.1 acres in the SE¼ SE¼ of Section 13, Township 4 South, Range 1 West, W.M., Marion County, Oregon.
- b) The slight differences between the acreage listed by ¼ ¼ on Certificate 22661 and the acreage figures for Certificate 22661 depicted on the revised transfer map for Transfer T-10029 are based upon an overlay of aerial photographs and digital tax lot maps for the area, as well as the Final Proof Survey map for Certificate 22661. By aligning landmarks, roads and other features on the sources of information, it is clear that the Public Land Survey 1/16th lines shown on the Final Proof Map were shifted slightly north of where they should have been, leading the Department to conclude that the land to which the right has always been appurtenant should be redescribed as it is shown in the revised transfer application and map.
- c) The following table describes the place of use description in existing Certificate 22661, and a proposed redescription based on the findings above:

Original Description of Place of Use under Certificate 22661		Proposed Redescription of Place of Use

15. Notice of the application for transfer was published on December 6, 2005, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
16. The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screening and/or by-pass device is necessary at the new point of diversion to prevent fish from entering the diversion and/or safely transport fish back to the body of water from which the fish were diverted and that the diversion is not currently equipped with an appropriate fish screening and/or by-pass device. This diversion may be eligible for screening cost share funds.
17. On June 8, 2007, the Department mailed a copy of the draft Preliminary Determination to the applicants. The draft Preliminary Determination proposed to approve Transfer Application T-10029 with conditions and set forth a deadline of July 9, 2007, for the applicant(s) to respond.
18. The applicants met with Department staff on June 11, 2007, and raised concerns with proposed Condition #4 of the draft Preliminary Determination. The applicants requested additional time through August 31, 2007, to meet with their agent and respond to the draft Preliminary Determination. The request for additional time was granted by the Department.
19. The watermaster met with Fred Netter (applicant) and his agent during a site visit of the subject property in June 2007 to observe the authorized and proposed points of diversion under Transfer T-10029. The Pudding River Slough branches off of the Pudding River for approximately 1.0 mile and then re-enters and contributes to the Pudding River.
20. On July 27, 2007, the applicants' agent met again with the local watermaster to discuss the proposed transfer and whether the inclusion of Condition #4 in the draft Preliminary Determination for Transfer T-10029 was appropriate. Based upon the site visit described in Finding #19 and a better understanding of the flow of water in the Pudding River Slough, the watermaster reconsidered his earlier concerns about the availability of water at the original points of diversion as compared to the proposed point of diversion and determined that the transfer can be made without injury.
21. Based upon the determination made in Finding #20 above, the Department has concluded that proposed Condition #4 of the draft Preliminary Determination is no longer appropriate. The condition is modified to remove the restriction on the diversion of water at the proposed point of diversion during periods when the Pudding River Slough (Unnamed Stream) is not contributing surface water flows to the Pudding River.
22. On August 27, 2007, the applicants provided the necessary information to demonstrate that the applicants are authorized to pursue the transfer.

23. On August 31, 2007, the Department issued a Preliminary Determination proposing to approve Transfer T-10029 and mailed a copy to the applicants and their agent. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on September 4, 2007, and in the *Woodburn Independent* newspaper on September 26, October 3, and October 10, 2007, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

Transfer Review Criteria [OAR 690-380-4010(2)]

24. Water has been used within the last five years according to the terms and conditions of the rights, and there is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
25. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Application T-10029.
26. The proposed changes would not result in enlargement of the rights.
27. The proposed changes would not result in injury to other water rights.

Conclusions of Law

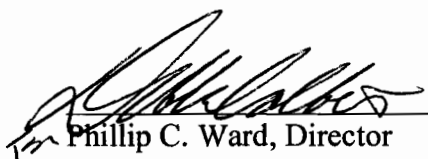

The changes in point of diversion and place of use proposed in Transfer Application T-10029 are consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000, and the place of use should be redescribed.

Now, therefore, it is ORDERED:

1. The changes in point of diversion and place of use and redescription of the place of use proposed in Transfer Application T-10029 are approved.
2. Water right certificates 22661, 27877 and 27878 are cancelled. New certificates will be issued describing the portions of Certificates 27877 and 27878 not affected by this transfer.
3. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 22661, 27877 and 27878 and any related decree.
4. The quantity of water diverted at the new point of diversion shall not exceed the quantity of water lawfully available at the original points of diversion.
5. The former place of use of the transferred rights shall no longer receive water under the rights.

6. Prior to diverting water, the water user shall install a fish screening and/or by-pass device, as appropriate, at the new point of diversion consistent with the Oregon Department of Fish and Wildlife's (ODFW) design and construction standards. Prior to installation, the water user shall obtain written approval from ODFW that the required screen and/or by-pass device meets ODFW's criteria. Prior to submitting a Claim of Beneficial Use, the water user must obtain written approval from ODFW that the required screening and/or by-pass device was installed to the state's criteria. The water user shall maintain and operate the fish screen and/or by-pass device, as appropriate, at the point of diversion consistent with ODFW's operational and maintenance standards.
7. When required by the Department, the water user shall install, maintain and operate an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
8. The approved changes shall be completed and full beneficial use of the water shall be made on or before **October 1, 2009**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
9. When satisfactory proof of the completed changes is received, new certificates confirming the rights transferred will be issued.
