ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of appropriation authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

2. On November 23, 2011 the agent submitted a revised map changing the footprint of the "from" and proposed places of use.
3. A further revision to the map was made on December 1, 2011.
4. The portion of the first right to be transferred is as follows:

Use: IRRIGATION of 118.5 ACRES
Priority Date: JULY 7, 1966
Rate: 0.55 CUBIC FOOT PER SECOND

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

6. There is a supplemental right under Certificate 85112 on the lands from which the water right is to be moved (Finding of Fact #4) that will not be exercised during the terms of this transfer.
7. Certificate 41383 for primary irrigation is within the place of use described in Finding of Fact #5. The applicant has requested to use Certificate 41383 as supplemental to the transferred right during the term of T-11307.
8. Notice of the application for transfer was published on October 11, 2011, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

Temporary Transfer Review Criteria

9. Water has been used within the last five years according to the terms and conditions of the right. There is no evidence available that would demonstrate that the right is subject to forfeiture under ORS 540.610.
10. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right are present.
11. The proposed change would not result in enlargement of the right.
12. The proposed change would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary change in place of use proposed in Temporary Transfer Application T-11307 is consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in place of use proposed in Temporary Transfer Application T-11307 is approved.
2. The former place of use **shall not** be irrigated as part of this water right during the 2012, 2013, 2014, 2015 and 2016 irrigation seasons.
3. The supplemental water right (Certificate 85112) within the place of use described in Finding of Fact #4 will not be exercised during the term of T-11307.
4. Water right Certificate 41383 within the proposed place of use described in Finding of Fact #5 will be used as supplemental during the term of T-11307.
5. The use shall revert to the authorized place of use at the end of the 2016 irrigation season.
6. The approval of this temporary transfer may be revoked or modified if the Department finds the change cause injury to any existing water right.
7. A subsequent application for permanent transfer of Certificate 87023 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
8. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 87023.

9. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
10. The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department.
11. The use of the remaining water right described by Certificate 87023 shall continue to be in accordance with the terms and conditions of Certificate 87023.
