9. The proposed modification would not result in enlargement of the ground water registration.

11. The proposed modification would not result in injury to other water rights.

Conclusions of Law

The additional points of appropriation proposed in Ground Water Registration Modification T-11257 are consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000.

Now, therefore, it is ORDERED:

1. The modification to Registration Application GR-2514 (Certificate of Registration GR-3833) proposed in Ground Water Registration Modification Application T-11257 is recognized. Recognition of the modification shall not be construed as a final determination of the right to appropriate ground water under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-2514 (Certificate of Registration GR-3833) and any related decree.
3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
4. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.

- a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation.
- b. The water user shall maintain the meters or measuring devices in good working order.
