4. T-9344 proposes to change the point of appropriation as follows:

| Proposed Point of Appropriation (Willamette Meridian) |       |         |     |       |  |
|---|-------|---------|-----|-------|--|
| Township  | Range | Section | Lot | Q-Q   | Coordinates                                  |
| 15S   | 14E   | 11      |     | SW SE | 951 feet N & 1375 feet W of SE corner Sec 11 |

5. Notice of the application for transfer was published pursuant to ORS 540.520 and OAR 690-380-4000. No comments were filed in response to the notice.
6. Water has been used within the last five years according to the terms and conditions of the right, and no evidence is available that would demonstrate that the right is subject to forfeiture under ORS 540.610.
7. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right is present.
8. The proposed change would not result in enlargement of the right.
9. The proposed change would not result in injury to other water rights.

**Conclusions of Law**

The change proposed in T-9344 complies with the requirements of ORS 537.705 and 540.505 to 540.580, and OAR 690-380-5000, and the Department finds that no injury to existing water rights would result from this transfer.

**Now, therefore, it is ORDERED:**

The change proposed in T-9344 is approved, subject to the following conditions.

1. The right to use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 79681 and any related decree.
2. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
3. The proposed change shall be completed on or before October 1, 2005.
4. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department by October 1, 2006.
5. The quantity of water diverted at the new point of appropriation shall not exceed the quantity of water lawfully available for this portion of the right at the original point of appropriation.
6. Prior to diverting water at the new point of appropriation, the water user shall install and maintain an in-line flow meter or other suitable device for measuring and recording the quantity of water appropriated. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
7. Certificate 79681 is cancelled; Certificate 80689 shall be issued to confirm the remaining rights.
8. When satisfactory proof of the completed change is received, a new certificate confirming the transferred water rights shall be issued.

WITNESS the signature of the Water Resources Director, affixed July 26, 2004.

  
Phillip C. Ward, Acting Director
