

acre irrigated in any one year. The quantity of water allowed herein, together with any other existing right from this point of diversion shall not exceed the current capacity of the diversion system.

The use allowed herein may be made any time when water can be put to beneficial use by irrigation, either for immediate crop growth or for forecast requirements to raise the soil moisture to field capacity in the soil profile to be utilized by plant growth in the subsequent growing season.

In the interest of conserving limited ground water and Butter Creek water supplies, the use of waters described as supplemental irrigation may be exercised at times when water is available at the primary source, provided the total quantity diverted from all sources of supply does not exceed the limitation allowed herein. Lands listed as being supplemental irrigation may be considered as primary irrigation if at time of final proof it is determined no primary right exists for these lands.

3. Permit Amendment Application T-10768 proposes an additional point of diversion between approximately 5 and 19 miles upstream from the existing points of diversion to:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
5 N	28 E	WM	10	NE SE	1960 FEET NORTH AND 350 FEET WEST FROM THE SE CORNER OF SECTION 10

4. Notice of the application for the permit amendment was published in the Department's weekly notice on February 3, 2009, and in the Hermiston Herald newspaper on April 21, 28, and May 5, 2010, pursuant to ORS 540.520(5). No comments were filed in response to the notices.

**Permit Amendment Review Criteria**

- 5. The change would not result in injury to other water rights.
- 6. The change does not enlarge the permit.
- 7. The change does not alter any other terms of the permit.

**Conclusions of Law**

The additional point of diversion proposed by Permit Amendment Application T-10768 is consistent with the requirements of ORS 537.211.

**Now, therefore, it is ORDERED:**

The change and subsequent use of water shall be subject to the following conditions:

- 1. The combined quantity of water diverted at the new point of diversion, together with that diverted at the old points of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.

2. Prior to water use from the proposed additional point of diversion, the permittee shall install meters or other suitable measuring devices as approved by the Director. The permittee shall maintain the meters or measuring devices in good working order, and shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
3. The measuring and recording devices shall be located:
  - a. At the proposed additional point of diversion from the Columbia River, and,
  - b. At the point where Columbia River water under this permit enters the permit holder's farm water delivery system.
4. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice
5. Water shall be acquired from the same surface water source as the original point of diversion.
6. Diversion screening facilities shall be designed, installed, and operated to Oregon Department of Fish and Wildlife specifications.
7. Approval of this permit amendment does not grant the permittee permission to trespass on lands not owned by the permittee.
8. All other terms and conditions of Permit S-51017 remain the same.
9. Permit S-51017, in the names of KENT R. AND SHANNON K. MADISON, is amended as described herein.

Dated at Salem, Oregon this 15 day of September, 2010.
