14. The proposed change would not result in enlargement of the right.
15. The proposed change would not result in injury to other water rights.

Conclusions of Law

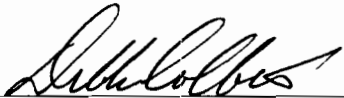

The change in point of appropriation and change in place of use proposed in Transfer Application T-10480 is consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

Now, therefore, it is ORDERED:

1. The change in point of appropriation and change in place of use proposed in Transfer Application T-10480 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 84174 and any related decree.
3. Water right certificate 84174 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer nor involved in T-10481.
4. The quantity of water diverted at the new point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.
5. Water use measurement conditions:

- a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation.
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
 7. The former place of use of the transferred right shall no longer receive water under the right.
 8. The approved change(s) shall be completed and full beneficial use of the water shall be made on or before **October 1, 2010**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change(s) and full beneficial use of the water.
 9. When satisfactory proof of the completed changes is received, a new certificate confirming the right transferred will be issued.
