In the Matter of Allocation of Conserved    )    FINAL ORDER ON COMPLETION OF  
Water Application CW-116,                     )    ALLOCATION OF CONSERVED WATER  
Deschutes County                             )    CW-116

**Applicant**

Tumalo Irrigation District  
64697 Cook Avenue

**Agent**

GSI Water Solutions  
Attn: Owen McMurtrey  
1600 SW Western Avenue, Suite 240  
Corvallis, OR 97333

**Applicable Law**

Any person or group of persons holding a water use subject to transfer as defined in ORS 540.505 may submit an application for an Allocation of Conserved Water to the Water Resources Commission for a conservation project that has not yet been implemented or was implemented within five years prior to the submission of the application. ORS 537.465. Under the Allocation of Conserved Water Program, a portion of the water proposed to be conserved by an applicant may be used on additional lands, put to a different use, or be leased or sold to another user. OAR 690-018-0010. A portion of the water conserved is allocated to the state to be converted to an instream water right or to revert to the public for appropriation by other water users. ORS 537.470(3).

An application for an allocation of conserved water shall include: (a) A description of the measure as implemented and the date on which the measure was implemented; (b) A description of the diversion facilities before the conservation measure was implemented and the amount of water that was diverted at the facilities before the conservation measure was implemented; (c) The amount of water needed to supply existing rights after implementation of the conservation measure; (d) The amount of water conserved by implementing the conservation measure; (e) The proposed allocation and use of the conserved water if different from the allocation specified in ORS 537.470; (f) The intended use of any water allocated to the applicant and the proposed location of use; (g) The applicant's choice of priority date for the conserved water; (h) Evidence that the measure was implemented within five years prior to the date of filing the application; and (i) Any other information the commission considers necessary to evaluate the application. ORS 537.465.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

After determining any quantity of water needed to mitigate the effects on other water rights, 25-percent of the conserved water shall be allocated to the state and 75-percent to the applicant unless the applicant proposes a higher allocation to the state or more than 25-percent of the funds used to finance the conservation measures comes from federal or state sources not subject to repayment. ORS 537.470(3).

If an application for the allocation of conserved water is approved, the Department shall issue orders describing the changes in the original water rights. Once the conservation project is finalized, the Department shall issue new certificates preserving the previously established-priority date of the rights to reflect the unaffected portion of the water rights and new certificates reflecting the changes for the portions of the water rights involved in the conserved water application. ORS 537.470(6).

ORS 537.455 to 537.500 authorize and establish the process by which a water right holder may submit a request for an allocation of conserved water. OAR Chapter 690, Division 18, implements the statutes and provides the Department’s procedures and criteria for evaluating allocation of conserved water applications. OAR Chapter 690, Division 077 provides additional criteria for evaluating proposed instream water rights.

### Findings of Fact

1. On April 2, 2020, Tumalo Irrigation District (TID) filed an allocation of conserved water application under Certificates 95175, 95176, and 95177. The Department assigned the application number CW-116.
2. On October 24, 2022, a Final Order Incorporating Settlement Agreement and Approving Allocation of Conserved Water CW-116 (Final Order) was issued. The Final Order is recorded at Special Order Volume 125, Pages 950-976.
3. The Final Order established the deadline for submitting a Notice of Completion of January 1, 2023, and the deadline for submitting a Request for Finalization of June 1, 2023.
4. The Final Order allocated the conserved water as follows:

### Conclusions of Law

The Findings of Fact and Conclusions of Law set forth in the Final Order Approving Allocation of Conserved Water CW-116, recorded at Special Order Volume 125, Pages 950-976, are incorporated as if set forth fully herein. The project described in Allocation of Conserved Water Application CW-116, is consistent with the criteria in ORS 537.455 to 537.500, and OAR Chapter 690, Divisions 018 and 077.

**Now, therefore, it is ORDERED:**

1. The project is complete.
2. The right to the use of the water is restricted to beneficial use at the place of use described in Certificates 95175, 95176, and 95177 and is subject to all other conditions and limitations contained in said certificate and any related decree.
3. The water user may use water on the existing place of use at the reduced rate and duty described below. Water Right Certificate 95175 is modified by the rate only and is as follows:

**Certificate:** 95175 in the name of TUMALO IRRIGATION DISTRICT (confirmed by Tumalo Creek Decree)

**Use:** IRRIGATION OF 5772.98 ACRES; 3.46 ACRES INCHOATE IRRIGATION, 23.06 ACRES-EQUIVALENT FOR POND USE, 2.0 ACRES-EQUIVALENT FOR INDUSTRIAL USE, AND DOMESTIC USE INCLUDING LIVESTOCK

**Priority Dates:** AUGUST 5, 1900, SEPTEMBER 1900, APRIL 28, 1905, MAY 27, 1907, and JUNE 1, 1907.

**Rate:** 50.652 CUBIC FEET PER SECOND (CFS), measured at the point of diversion from the source:

Priority Date	CFS	Acres Equivalent
8/5/1900	4.486	407.60
9/1900	31.457	4056.45
4/28/1905	3.320	301.60
5/27/1907	0.465	43.20
6/1/1907	10.924	992.65
<b>Totals</b>	<b>50.652</b>	<b>5,801.50</b>

**Limit/Duty:** The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-SEVENTIETH of one cubic foot per second (or its equivalent) and 1.8 acre-feet, measured at or within one-half mile of the land to be irrigated, for each acre irrigated during the irrigation season of each year.

**Source:** TUMALO CREEK, tributary to the DESCHUTES RIVER

**Authorized Points of Diversion:**

4. Water Right Certificate 95176 is modified by the rate and duty only and is as follows:

**Certificate:** 95176 in the name of TUMALO IRRIGATION DISTRICT (perfected under Permit S-19628)

**Use:** IRRIGATION OF 1,556.25 ACRES, INCHOATE IRRIGATION OF 17.68 ACRES, 2.00 ACRES EQUIVALENT FOR INDUSTRIAL USE, 3.77 ACRES-EQUIVALENT FOR POND MAINTENANCE, SUPPLEMENTAL IRRIGATION OF 4997.38 ACRES, 3.46 ACRES FOR INCHOATE SUPPLEMENTAL IRRIGATION, 2.00 ACRES-EQUIVALENT FOR SUPPLEMENTAL INDUSTRIAL USE, 8.06 ACRES-EQUIVALENT FOR SUPPLEMENTAL POND MAINTENANCE, and STOCK AND DOMESTIC USE

**Priority Date:** OCTOBER 29, 1913

**Rate:** 129.846 CUBIC FEET PER SECOND

**Limit/Duty:** The use is limited to 129.846 CUBIC FEET PER SECOND (CFS) from TUMALO CREEK with any deficiency from Tumalo Creek to be made up by diverting no more than 40.0 CFS from CRATER CREEK, 34.0 CFS from LITTLE CRATER CREEK, and 1.0 CFS from THE THREE SPRING BRANCHES, or its equivalent in case of rotation, measured at the point of diversion from the source.

The amount of water used for irrigation, together with the amount secured under any other right for existing for the same lands, is limited as shown in the table below, and shall conform to such reasonable rotation system as may be ordered by the proper state officer, provided that the quantity of water to be diverted during the non-irrigation season for stock use shall not exceed 60.0 CFS at any time nor shall it exceed the equivalent of a continuous flow of 20.0 CFS during the non-irrigation season.

5. Water Right Certificate 95177 is modified by the duty only and is as follows:

- Certificate:** 95177 in the name of TUMALO IRRIGATION DISTRICT (perfected under Permit S-624)
- Use:** SUPPLEMENTAL USE ON 7,329.23 ACRES OF IRRIGATION, 21.14 ACRES OF INCHOATE IRRIGATION, 4.0 ACRES-EQUIVALENT OF INDUSTRIAL USE, AND 26.83 ACRES-EQUIVALENT OF POND MAINTENANCE.
- Priority Date:** APRIL 7, 1911
- Rate:** 30,331.13 ACRE-FEET
- Limit/Duty:** The use is limited to 30,331.13 ACRE-FEET STORED WATER ONLY or its equivalent in case of rotation measured at the point of diversion from the source. The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of the following amounts measured at the point of diversion from the Deschutes River for each acre irrigated during the periods indicated during the irrigation season of each year.

SEASON	PERIOD OF USE	ACRE-FEET PER ACRE	TOTAL DIVERSION PER SEASON
1	April 1 through April 30 and October 1 through October 31	0.75	30,331.13 ACRE-FEET

6. Water use measurement conditions:

- a. Before the use of the Applicant's portion of conserved water, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion.
- b. The water user shall maintain the meters or measuring devices in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

7. All conserved water shall be managed instream for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values shall provide for a protection of flows until a Request for Finalization is submitted as follows:

Maximum Annual and Seasonal Volume Limitations:

Priority Date	Season	Period of Use	Volume (AF)
April 7, 1911	1	April 1 through April 30 and October 1 through October 31	167.94
	2	May 1 through May 14 and September 15 through September 30	111.96
	3	May 15 through September 14	1,656.97
<b>Total Annual Volume</b>			<b>1,936.87</b>

The volume to be protected throughout the year will be determined by the local Watermaster to ensure the seasonal and annual volumes are not exceeded.

To account for channel losses, an 18 percent loss factor shall be used between the Crescent Creek Gauging Station No. 14060000 and the Benham Falls Gauging Station No. 14064500 on the Deschutes River. A 7 percent loss factor shall be used on the Deschutes River between Benham Falls and the City of Bend. For example, if 9.18 cfs was protected under this right at Crescent Creek Gauging Station No. 14064500, then the 7.53 cfs would be protected at Benham Falls and 7.00 cfs would be protected at Bend.

This instream flow shall be additive to the 5.0 cfs flow release required at Crescent Creek Gauging Station Number 1406000, as specified in the Final Order Approving Allocation of Conserved Water CW-37, recorded at Special Order Volume 67, pp. 509 – 517, at p. 512.

- The deadline for filing the Request for Finalization is June 1, 2023.

Upon filing the Request for Finalization:

- The project is complete, and no additional time is needed for finalization.*
- The Department shall issue a new instream water right certificate for the conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat, other ecological values, as follows:*

April 7, 1911	1	April 1 through April 30 and October 1 through October 31	167.94
	2	May 1 through May 14 and September 15 through September 30	111.96
	3	May 15 through September 14	1,656.97
<b>Total Annual Volume</b>			<b>1,936.87</b>

The volume to be protected throughout the year will be determined by the local Watermaster to ensure the seasonal and annual volumes are not exceeded.

*To account for channel losses, an 18 percent loss factor shall be used between the Crescent Creek Gauging Station No. 14060000 and the Benham Falls Gauging Station No. 14064500 on the Deschutes River. A 7 percent loss factor shall be used on the Deschutes River between Benham Falls and the City of Bend. For example, if 9.18 cfs was protected under this right at Crescent Creek Gauging Station No. 14064500, then the 7.53 cfs would be protected at Benham Falls and 7.00 cfs would be protected at Bend.*

*Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original points of diversion. Stream channel losses and gains calculated based on available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original point of diversion within the specified stream reach.*

*The instream right established by this allocation shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and be in addition to instream water rights established pursuant to ORS 537.348 or 537.470 unless otherwise specified in an order approving a new instream water right under these statutes.*

*This instream flow shall be additive to the 5.0 cfs flow release required at Crescent Creek Gauging Station Number 1406000, as specified in the Memorandum of Agreement between Tumalo Irrigation District and the Oregon Department of Water Resources, recorded at Special Order Volume 120, Pages 773 and 774.*
