

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of the Proposed Lease of) DETERMINATION and
Existing Water Rights for Instream Use,) FINAL ORDER ON PROPOSED
Certificate 83571, Deschutes County) INSTREAM LEASE

Authority

ORS 537.348 establishes the process in which a water right holder may submit a request to lease an existing water right for instream purposes. OAR Chapter 690, Division 077 implements the statutes and provides the Department's procedures and criteria for evaluating instream lease applications.

Lessor #1

Pooled Instream Lease for several water right holders (described in Findings of Fact #3)

Lessor #2

Central Oregon Irrigation District (COID)
1055 SW Lake Court
Redmond, OR 97756
lauraw@coid.org

Lessee

Deschutes River Conservancy (DRC)
P.O. Box 1560
Bend, Oregon 97709
gen@deschutesriver.org

Findings of Fact

1. On April 28, 2009 COID, on behalf of several water right holders and the DRC filed an application to lease a portion of Certificate 83571 for instream use. The Department assigned the application number IL-994.
2. On May 11, 2009 COID requested that the Department amend instream lease application IL-994 by removing 1.03 acres owned by E. Lewis and Barbra Becker.
3. The portion of the right to be leased is as follows:
 - Certificate:** 83571 in the name of Central Oregon Irrigation District
 - Use:** Irrigation of 23.9 acres
 - Priority Date:** October 31, 1900 and December 2, 1907
 - Season of Use:** April 1 through October 31, further limited as follows:
 - April 1 through April 30 & October 1 through October 31
 - May 1 through May 14 & September 16 through September 30
 - May 15 through September 15

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Maximum Quantity (Rate) that can be applied to an acre:

Season 1: limited to 1/80th cubic foot per second (CFS) per acre

Season 2: limited to 1/60th CFS per acre

Season 3: limited to 1/32.4th CFS per acre

Maximum Duty that can be applied to an acre:

Not to exceed 9.91 acre-feet (AF) per acre per year.

The above listed rates and duty reflect allowance of a 45% transmission loss as determined by decree of the Circuit Court of Deschutes County, dated March 24, 1933. Those lands not served from the district main canal systems, but by direct pumping from the Deschutes River, are not allowed the 45% transmission loss.

Source: The Deschutes River, tributary to the Columbia River

Authorized Points of Diversion (POD):

Township	Range	Meridian	Sec	¼ ¼	Survey Coordinates		
17	S	12	E	W.M.	29	SE NE	POD #11 (COID NORTH CANAL): 850 FEET NORTH AND 630 FEET WEST FROM THE EAST ¼ CORNER OF SECTION 29

Authorized Places of Use:

Twp	Rng	Mer	Sec	Q-Q	Acres	Tax Lot	POD #	Land Owner
14S	13E	WM	32	SE SW	2.00	1000	11	Fred & Karen Crouch
15S	12E	WM	14	NE NE	3.50	300	11	John & Sally Green
15S	13E	WM	31	NE NW	5.40	102	11	Edge Development Group LLC
16S	12E	WM	23	NE SE	7.30	303	11	Paul & Holly Schafer
16S	12E	WM	23	NW SE	5.70	303	11	Paul & Holly Schafer
TOTAL:					23.90			

- The Department has determined that the season of use described in Certificate 83571 contains scrivener errors. Consistent with the Decree for the Deschutes River (Volume 12, Page 282), the irrigation season should be:

Season of Use: April 1 through October 31, further limited as follows:

April 1 through April 30 & October 1 through October 31 described herein as Season 1

May 1 through May 14 & September 15 through September 30 described herein as Season 2

May 15 through September 14 described herein as Season 3

- Certificate 83571 is a deficient water right. If water were diverted simultaneously to all authorized lands and uses described in the right at the maximum rates and duty allowed (described in Finding of Fact #3, the total rate and duty for the water right would be exceeded. In the event water were diverted simultaneously to all authorized lands and uses described in the right at the maximum rates and duty allowed at the POD (described in Finding of Fact #3), the portion of the right involved in this instream lease would be limited as described in the tables below. These rates and duty are also the quantities by which the diversion at POD #11 under Certificate 83571 shall be reduced, if this instream lease is approved.

Priority Date	Season 1	Season 2	Season 3	Duty
October 31, 1900	0.298 CFS	0.397 CFS	0.525 CFS	236.25 AF
December 2, 1907			0.211 CFS	

- The lease application includes the information required under OAR 690-077-0076(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(1). No comments were received.
- The applicant requested that water be protected instream during the period of April 1 through October 31, a 214-day period, at the full rate and volume. At the full rate for 214 days, the maximum volume would be exceeded. To avoid injury and enlargement, the season will be reduced to 209-days at the full rate allowed by Certificate 84371.
- The Lessor and Lessee have requested to protect water instream from the POD described in Finding of Fact #3 to the mouth of the Deschutes River. A portion of the water diverted at the POD returns to the Deschutes River within the proposed reach and is available to downstream water right holders. Return flows from the existing use are back in the river system once river flows reach the Madras Gage. To prevent injury to downstream water right holders, the quantity of water that may be protected instream requires modification and return flows should be accounted for at the Madras Gage.
- The instream use has been modified from the original lease application to prevent injury and/or enlargement and is as follows:

Deschutes River, tributary to the Columbia River

Instream Reach #1: From POD #1 (as described in Finding of Fact #3) to the Madras Gage

Certificate	Priority Date	Instream Rate (cfs)	Instream Volume (af)	Period Protected Instream
83571	10/31/1900	Season 1: 0.164 Season 2: 0.219 Season 3: 0.406	130.27	April 1 – Oct. 26

Instream Reach #2: From the Madras Gage to the mouth of the Deschutes River

Certificate	Priority Date	Instream Rate (cfs)	Instream Volume (af)	Period Protected Instream
83571	10/31/1900	0.104	43.02	April 1 – Oct. 26

- Other conditions to prevent injury and enlargement are:

The amount of water to be leased instream under Certificate 83571 does not include a 45% transmission loss associated with this right when used for its originally authorized purpose. The transmission loss may not be leased and protected instream.

Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original point of diversion. Stream channel losses and gains calculated based on available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original points of diversion within the specified stream reach.

10. Supplemental water right Certificate 76714 is appurtenant to all or a portion of the lands described in Finding of Fact # 3. The Lessor and Lessee have not requested that this water right be included as part of this lease application. During the term of the lease, water use under this right will be suspended.
11. If approved, this instream lease is not reasonably expected to significantly affect land use as prescribed by ORS 197.180, OAR Chapter 660, Divisions 30 and 31, and OAR Chapter 690, Division 5.
12. Based upon review of the application, comments received, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. This finding is made through an abbreviated review recognizing that the lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
13. If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077-0070 or OAR 690-077-0075 a new injury review shall be required. Transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of future leases or transfers.
14. The Lessor has requested that the lease terminate on October 31, 2009.

CONCLUSIONS OF LAW

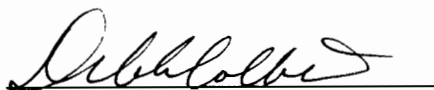

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

ORDER

Therefore, it is ORDERED:

1. That the Lease as described herein is APPROVED.
2. The former place of use will no longer receive water as part of these rights, any supplemental rights, or any other layered water rights for irrigation use, including ground water registrations during the term of the lease.
3. The lease will terminate on October 31, 2009.

Dated at Salem, Oregon this 2nd day of June, 2009.

Phillip C. Ward, Director *FN*

Mailing date: JUN 08 2009
