15. Certificate 85124 authorizes points of appropriation from two different subareas (D and H) of the Stage Gulch Critical Ground Water Area. Water use from an authorized point of appropriation within a specific subarea may not be transferred to a different subarea. Therefore, the combined water use from the Lorenzo Well, Reese Well, and Well #3 (all located within Subarea H) under Certificate 85124 as proposed in this transfer, may not exceed 1.09 CFS, and is further limited as ordered for the 2020 Annual Allocation of Groundwater in the Stage Gulch Critical Groundwater Area, Subarea H, under Certificate 85124 (Special Order Volume 115 Pages 475-480).

16. The portion of the fifth right to be transferred is as follows:

Certificate: 87042 issued in the names of ROBERT C., RICK L., AND DOUGLAS L. HALE (perfected under Permit G-5215)

Use: PRIMARY IRRIGATION of 98.87 ACRES

Priority Dates: FEBRUARY 16, 1973

Rate: 0.88 CUBIC FOOT PER SECOND

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

18. The portion of the sixth right to be transferred is as follows:

Certificate: 87666 issued in the name of HALE FARMS, LLC (perfected under Permit G-5335)

Use: IRRIGATION of 81.02 ACRES

Priority Dates: JULY 19, 1974

Rate: 0.38 CUBIC FOOT PER SECOND, if available at the original point of appropriation

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. The irrigation season used herein shall include any time of each year that water can be put to beneficial use by irrigation, either for immediate crop growth or for forecast requirements to raise the soil moisture to field capacity in the soil profile to be utilized by plant growth in the subsequent growing season, provided the amount of water used at the authorized place of use, together with the amount of water approved for use under Certificate 86680 shall not exceed 1.86 cubic feet per second and 1,014.56 acre feet per year, which reflect the capacity of the well system at the time of perfection attributable to the rights modified by T-10692.

21. The portion of the seventh right to be transferred is as follows:

Certificate: 87667 issued in the name of HALE FARMS, LLC (perfected under Permit G-5337)

Use: IRRIGATION of 111.14 ACRES

Rate: 1.15 CUBIC FOOT PER SECOND, if available at the original point of appropriation

Priority Dates: OCTOBER 21, 1974

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. The irrigation season used herein shall include any time of each year that water can be put to beneficial use by irrigation, either for immediate crop growth or for forecast requirements to raise the soil moisture to field capacity in the soil profile to be utilized by plant growth in the subsequent growing season, provided the amount of water use at the authorized place of use together with the amount of water approved for use under Certificate 86679 shall not exceed 1.86 cubic feet per second and 1,014.56 acre feet per year, which reflect the capacity of the well system at the time of perfection attributable to the rights modified by T-10692.

28. Certain authorized and proposed places of use as described in prior Findings of Facts in this final order are layered with Water Right Permit S-55114 and/or Permit S-54773, which are for use of water from the Columbia River, tributary to the Pacific Ocean. The applicant has stated that these permit will not be exercised or transferred on any parcels associated with this transfer during the regular 2020 irrigation season.
29. Portions of water rights for primary irrigation under Certificate 74762 at authorized places of use are layered with Certificate 87042 and Permit S-54773 for supplemental irrigation. The application does not include the transfer of layered supplemental irrigation under this permit. In the signed application, a statement is made pursuant to OAR 690-385-3110 that supplemental water use under Certificate 87042 and Permit S-54773 appurtenant to the authorized places of use for primary irrigation under Certificate 74762 would not be exercised during the period of this temporary transfer.
30. Portions of the proposed place of use will become layered with Certificates 83134, inchoate lands under T-11473 having May 10, 1979 priority date, and Certificate 84095; however, none of these lands received an allocation of groundwater for the year 2020 (see Special Order Volume 115, Pages 457, 532, and 635).
31. The district temporary transfer application satisfies the criteria of ORS 540.570 and OAR 690-385-3000, contains the information required under OAR 690-385-3200, and includes a map meeting the requirements of OAR 690-385-3300.
32. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
33. The water rights are subject to transfer as defined in OAR 690-385-0100(17).
34. Diversion structures, district canals, pumps, pump stations, ditches, pipeline, and sprinkler systems sufficient to use the full amount of water allowed under the existing rights are present.
35. The proposed changes in places of use and points of appropriation will not result in enlargement of the rights as defined in OAR 690-385-0100(6).
36. The proposed changes in places of use and points of appropriation would not result in injury to other water rights as defined in OAR 690-385-0100(4).
37. All other applicable requirements for district temporary water right transfers are met.

Conclusions of Law

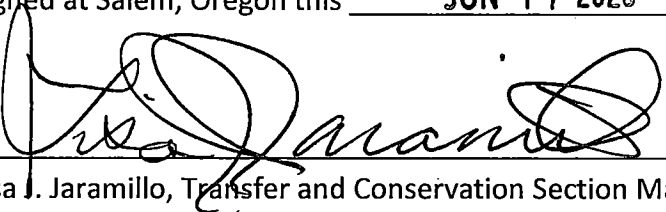

The temporary changes in place of use and the changes in the points of diversions as needed to convey water to the portions of the temporary place of use proposed in application Temporary Transfer Application T-13393 are consistent with the requirements of ORS 540.570 and OAR 690-385-8000.

Now, therefore, it is ORDERED:

1. The temporary changes in place of use and additional point of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-13393 are approved, providing that water use from an proposed point of appropriation within a specific subarea of the Stage Gulch Critical Ground Water Area may not have originated from an authorized point of appropriation from a different subarea.
2. All water use from any proposed point of appropriation from wells located within the Stage Gulch Critical Groundwater Area is subject to any 2020 annual allocation as authorized in a final order of the Department for its originating authorized point of appropriation on the same water right.
3. The former places of use **shall not** be irrigated as part of these water rights during the 2020 irrigation season.
4. Supplemental water rights appurtenant to the authorized places of use involved in Transfer T-13393, as described in the original water rights, shall remain unexercised during the 2020 irrigation season.
5. The use shall revert to the authorized place of use and authorized points of appropriation after the 2020 irrigation season.
6. Any application for permanent transfer of Certificates 74762, 80849, 80850, 85124, 87042, 87666, 87667, 92001, and 94107 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Divisions 380 or 385. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
7. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture of Certificates 74762, 80849, 80850, 85124, 87042, 87666, 87667, 92001, and 94107 under ORS 540.610.
8. The use of water on the lands, from which the water right is transferred and at the new temporary place of use, during the same irrigation season or calendar year is prohibited and may subject the district and/or landowners to civil penalties.
9. The water user shall maintain and operate the existing measurement devices and shall make such improvements as may be required by the Department.
10. The use of water under this temporary transfer may be conditioned or revoked at any time to the extent necessary to avoid injury if the Department finds the transfer causes injury to any existing water right.
11. The use of water at the temporary places of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 74762, 80849, 80850, 85124, 87042, 87666, 87667, 92001, and 94107.

12. The use of the remaining water rights described by Certificates 74762, 80849, 80850, 85124, 87042, 87666, 87667, 92001, and 94107 not involved in this transfer shall continue to be in accordance with the terms and conditions of those Certificates.

Signed at Salem, Oregon this JUN 17 2020.

Lisa J. Jaramillo, Transfer and Conservation Section Manager for
THOMAS M. BYLER, DIRECTOR
Oregon Water Resources Department

Mailing Date: JUN 18 2020
