

**BEFORE THE WATER RESOURCES DEPARTMENT  
OF THE  
STATE OF OREGON**

In the Matter of Instream Lease Application ) DETERMINATION and  
IL-1759, Hood River County ) FINAL ORDER ON PROPOSED  
) INSTREAM LEASE

**Authority**

Oregon Revised Statute (ORS) 537.348 establishes the process in which a water right holder may submit a request to lease an existing water right for instream purposes. Oregon Administrative Rule (OAR) Chapter 690, Division 077 implements the statutes and provides the Department's procedures and criteria for evaluating instream lease applications.

**Lessor**

Pooled Instream Lease on behalf of several water users (described in Findings of Fact No's 2, 3 and 4)

**Co-Lessor**

East Fork Irrigation District  
P.O. Box 162  
Odell, Oregon 97044

**Findings of Fact**

1. On June 17, 2019, East Fork Irrigation District filed an application on behalf of several water right users, to lease portions of Certificates 92000, 80929, and 80926 for instream use. The Department assigned the application number IL-1759.
2. The portion of the first right to be leased is as follows:

5. Water right Certificates 92000, 80929 and 80926, do not describe the season of use, however the Hood River Decree identifies the Irrigation season as beginning on April 15 and ending on the 1<sup>st</sup> day of October of each year.
6. The lease application includes the information required under OAR 690-077-0076(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(1). No comments were received.
7. The instream use has been adjusted to prevent enlargement of the right and is as follows:  
East Fork Hood River, tributary to Hood River

**Instream Reach:** From the POD (as described in Finding of Facts No. 2, 3 and 4) to the mouth of the East Fork Hood River at RM 0.0

Certificate	Priority Date	Instream Rate (CFS)	Instream Volume (AF)	Period Protected Instream
92000	11/25/1895	0.169	40.2	June 3 through September 30
80929	3/13/1964	0.130	30.9	
80926	6/14/1967	0.025	6.0	
<b>Totals</b>		0.324	77.1	

8. Other conditions to prevent injury and enlargement are:

Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original point of diversion. Stream channel losses and gains calculated based on the best available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original points of diversion within the specified stream reach.

9. The amount and timing of the proposed instream flow is allowable within the limits and use of the original water rights.
10. The protection of flows within the proposed reach is appropriate, considering:
  - a. The instream water use begins at the recorded point of diversion;
  - b. The location of confluences with other streams downstream of the point of diversion.
  - c. There are no known areas of natural loss of streamflow to the river bed downstream from the point of diversion; and

- d. Any return flows resulting from the exercise of the existing water right would re-enter the river downstream of the reach of the instream water right.
11. The total monthly quantities of water to be protected under the existing and proposed instream rights in the reach will provide for a beneficial purpose.
12. The total monthly quantities of water to be protected instream under existing and proposed instream rights in the reach do not exceed the estimated average natural flow.
13. If approved, this instream lease is not reasonably expected to significantly affect land use as prescribed by ORS 197.180, OAR Chapter 660, Divisions 30 and 31, and OAR Chapter 690, Division 5.
14. Based upon review of the application, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. The order approving this instream lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
15. If a right which has been leased is later proposed to be leased again, transferred and/or reviewed under an allocation of conserved water, a new injury review shall be required. For example, instream transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of any future transactions.
16. The Lessors and Co-Lessor have requested that the lease terminate in September, however the last day of the irrigation season is October 1. The lease will terminate on October 1, 2019. The lease may commence on the date this final order is signed.
17. The Lessors and Co-Lessor have requested that there not be an option to terminate the lease.

### **Conclusions of Law**

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

### **Now, therefore it is ORDERED:**

1. The Lease as described herein is APPROVED.
2. During the term of the lease, the former place of use will no longer receive water as part of these rights, any supplemental rights, or any other layered irrigation water rights, including ground water registrations and permits.

3. The term of the lease will commence upon approval of the instream lease and terminate on October 1, 2019. The lease may not be terminated by any party to the lease prior to specified termination date.
