Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

OREGON PARKS AND RECREATION DEPARTMENT
61323 HWY 203
UNION, OR 97883

Findings of Fact

1. On September 25, 2017, OREGON PARKS AND RECREATION DEPARTMENT filed an application for an additional point of diversion and a change in point of diversion under Certificate 3113. The Department assigned the application number T-12753.
2. Notice of the application for transfer was published on October 3, 2017, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On February 6, 2018, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12753 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of March 6, 2018, for the applicant to respond. The applicant requested the completion date be extended to October 2, 2023 and for the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. On June 18, 2018, the Department issued a Preliminary Determination proposing to approve Transfer Application T-12753 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published in the Department's weekly notice on June 19, 2018, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

6. Certificate 3113 does not describe the location of the point of diversion, however information is available from the Wallowa River Decree tabulation, the CWRE's survey and water right certificate 48313 indicating the points of diversion are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
3 S	45 E	WM	5	NE NW	SILVER LAKE AND MITCHELL DITCHES - 900 FEET SOUTH AND 1700 FEET EAST FROM THE NW CORNER OF SECTION 5

- The Mitchell Ditch is a lateral ditch off of the Silver Lake Ditch described in the Wallowa River Decree findings, Paragraph 19.

7. Transfer Application T-12753 proposes to move the authorized point of diversion for some lands and add an additional point of diversion for some lands approximately 1300 feet downstream to:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
3 S	45 E	MDM	5	NW NW	FARMERS DITCH - 157 FEET SOUTH AND 566 FEET EAST FROM THE NW CORNER OF SECTION 5

8. The table below lists the acreage involved in the transfer with the proposed POD's:

9. The supplementary irrigation right (TRACT #3) with an August 14, 1900 priority date from Certificate 3113 out of the Citizen's ditch (aka Farmer's ditch) will remain in effect on the remaining right certificate.
10. The Oregon Department of Fish and Wildlife has determined that the diversion is not currently equipped with an appropriate fish screen, but a fish screen may be required in the future at the new point of diversion to prevent fish from entering the diversion.

Transfer Review Criteria [OAR 690-380-4010(2)]

11. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
12. A diversion structure and ditch sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12753.
13. The proposed changes would not result in enlargement of the right.
14. The proposed changes would not result in injury to other water rights.

Conclusions of Law

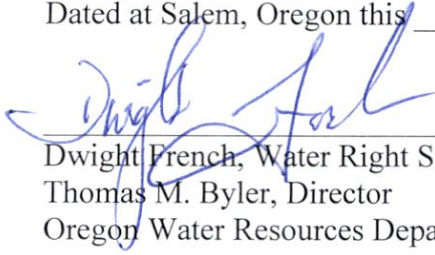

The additional point of diversion and change in point of diversion proposed in Transfer Application T-12753 are consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional point of diversion and change in point of diversion proposed in Transfer Application T-12753 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 3113 and any related decree.
3. Water right Certificate 3113 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer.
4. The quantity of water diverted at the new or additional points of diversion, together with that diverted at the original points of diversion, shall not exceed the quantity of water lawfully available at the original points of diversion.
5. Water use measurement conditions:
 - a. **Before water use may begin** under this order, the water user shall install a meter or measuring device at each point of diversion (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
6. The Oregon Department of Fish and Wildlife (ODFW) may require the water user to install an approved fish screen at the new point of diversion within one year after receiving written notification that a fish screen is required. Once installed the water user shall maintain and operate the fish screen at the new point of diversion according to ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.
7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2023**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

8. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.
